

CENTER FOR GLOBAL CLINICAL RESEARCH DATA

Clinical Trial Data Sharing and Reuse A New Reality for Researchers

Ida Sim, MD, PhD, Professor of Medicine, UCSF and Vivli Co-Founder

Rebecca Li, Vivli Executive Director

Faculty Co-Director of Research Ethics, Harvard Center for Bioethics

Harvard Medical School

October 2019

Agenda

1. Why share data?
2. What is the role of data standards in data sharing and reuse?
3. The Vivli Global Platform for Clinical Data sharing and Reuse as a use case

1. Why Should We Share Our Clinical Research Data

- Funder requirements
- Journal requirements (new as of 2018)
- Publicly stated commitments for industry (BIO, EFPIA, PhRMA)
- Drive new science (integrate data to drive new insights faster)
- Ethical obligations to trial participants
- Enhance and advance your career

What are Journals Requiring as of July 1, 2018?

The NEW ENGLAND JOURNAL of MEDICINE

EDITORIALS

Data Sharing Statements for Clinical Trials — A Requirement of the International Committee of Medical Journal Editors

The International Committee of Medical Journal Editors (ICMJE) believes there is an ethical obligation to responsibly share data generated by clinical trials. This requirement is explained at www.icmje.org/recommendations/browse/publishing-and-editorial-issues/clinical-trial-registration.html. If the data sharing plan

- Major journals including NEJM, JAMA, The Lancet, BMJ, Annals of Internal Med, PLoS Medicine, and hundreds of others (ICMJE)
- Trial manuscripts must be submitted with a data sharing statement
 - Must describe how you will share your Individual participant-level data (IPD), including who, what, when, where, and why
- IPD sharing is not (yet) required but “editors may take into consideration data sharing statements when making editorial decisions”

Taichman DB, et al. *N Engl J Med* 2017; 376:2277-2279

Declaring Your Data Re-use Plans as part of the Trial Registration Record... before the 1st patient is enrolled

- Data sharing plan is part of the ClinicalTrials.gov registration record
- **As of 1 January 2019, ICMJE requires registration of your data sharing plan at time of trial registration.**

▼ 12. IPD Sharing Statement

Plan to Share IPD

Definition: Indicate whether there is a plan to make individual participant data (IPD) collected in this study, including data dictionaries, available to other researchers (typically after the end of the study). Select one.

- **Yes:** There is a plan to make IPD and related data dictionaries available.
- **No:** There is not a plan to make IPD available.
- **Undecided:** It is not yet known if there will be a plan to make IPD available.

Note: Undecided is not allowed as a choice for the ICMJE but is a choice in CT.gov

Many Patients Expect Data Sharing and Reuse

Roxana Mehran @Drroxmehran · 4 Apr 2017

trial participants-"share the data as widely as possible and as soon as possible to advance human health" [#NEJMDataSummit](#) <#>

Vinay Prasad MD MPH @VPplenarysesh · 4 Apr 2

Patients listened to trialists fears for one day and t
it's supposed to go [#nejmdatsummit](#)

Anna McCollister @annamcslipp · 4 Apr 2017

.@JeffDrazen -living in time where "trust me I'm a L
have data out there & let people see themselves <#>

Sharon F. Terry @sharonfterry · 4 Apr 2017

Love idea that next generation is open to openness-will we watch people die
meanwhile? Do we have appetite for such waiting? [#NEJMDataSummit](#)

P. F. Anderson @pfanderson · 4 Apr 2017

OUTCOMES of patient panel > Share early, often, with me, responsibly,
understandably [#NEJMDataSummit](#)

Aaron Eisman @aaroneisman · 4 Apr 2017

Patients incredulous that sharing data isn't the norm, speaking loud and clear:
"share my data!" [#NEJMDataSummit](#)

*NEJM Aligning Incentives for Sharing Clinical Trial Data
Summit, Boston, MA. April 2017*

“Patients don’t have patience”

Why is data used only one time to answer one question (the primary endpoint) rather than leveraging participants’ contributions to answer multiple questions to understand disease and find treatments?

Barriers to Data Sharing (IPD) for Academics

- For most academic trialists (Data Contributors)
 - secure data hosting and sharing platforms not available or limited to within the institution
 - no standard data use agreements
 - no independent review process available to adjudicate data requests
 - cost and difficulty of de-identifying IPD and making it available
 - **All this makes it difficult to meet data sharing requirements**
- For Data Users
 - difficult to discover what IPD is available for sharing
 - **combining datasets from different platforms is resource- and time-intensive**
 - **different data standards, data requirements, security standards, policies**

The Role of Data Standards in Data Sharing and Reuse

- Increasing the number of datasets that use data standards will allow meta-analysts to more easily harmonize and integrate studies and perform analyses such as:
 - Conducting new subgroup analyses
 - Model prognostic or diagnostic data
 - Aggregate studies with time to event outcomes such as survival

What Data is Shared Through Vivli?

Item	Description
<i>Recommended Set</i>	
Study protocol	Final protocol with all amendments
Data dictionary	Detailed descriptions of each variable in the dataset, including the definition, source, coding, etc. of the variable
Statistical Analysis Plan	Description of the principal features of the analyses described in the protocol
Clinical Study Report (CSR)	Report that summarizes the efficacy and safety data from the study (after regulatory decision)
IPD dataset	Final cleaned individual participant-level data, de-identified/anonymized
<i>Optional</i>	
Analytic code	Software code used to carry out prespecified and additional analyses
Analysis ready IPD dataset	Dataset in a format used to carry out a sponsor's analyses
Case report forms	Forms used to collect the data that is described in the protocol for each trial participant

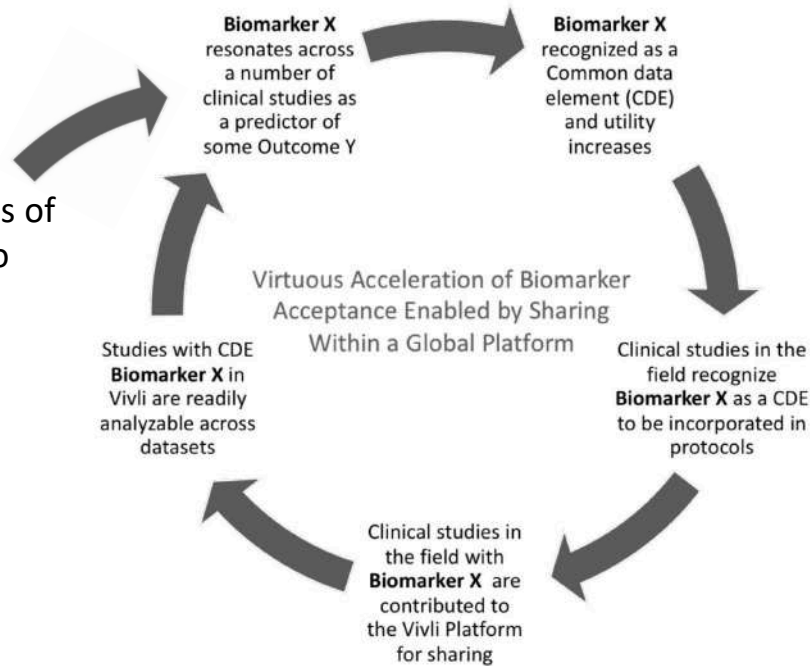

NOTE: *this is a subset of the entire full data package and includes the data that underlies the publication findings (tables, figures)

Data Sharing May Drive Adoption of CDEs

Figure 1

Vision of Virtuous Cycle of Sharing and Advancement of Biomarker Science Using the Vivli Platform

Datasets with variations of Biomarker X mapped to e.g., a common CDISC variable

Li, Rebecca, and Ida Sim. "How Clinical Trial Data Sharing Platforms Can Advance the Study of Biomarkers." *The Journal of Law, Medicine & Ethics* 47, no. 3 (2019): 369-373.

Agenda

1. Why share data?
2. What is the role of data standards in data sharing and reuse?
3. **The Vivli Global Platform for Clinical Data sharing and Reuse as a use case**

Introducing Vivli

THE ENTITY

- Non-profit organization
- Convening function
 - Biomedical industry (pharma, bio, device)
 - Academia
 - Non-profit funders and foundations
 - Government (funders and regulators)
 - Patient/patient advocates
- Governance and policy
 - Harmonizing language & agreements
 - Move culture of data sharing
- Advocacy
 - Lowering barriers
 - Promoting incentives
- Oversight of implementation

THE PLATFORM

- A user-friendly, secure, state-of-the art data sharing and computing platform
- Serving the international community, including trials from any disease, country, sponsor, funder, or investigator
 - Open search
 - Robust security
 - Modern tools and technologies

Vivli Solution Models for Data Sharing

Institutional Sharing

- Institutional membership
- Ensures all researchers at an institution or division have access to a central sharing resource
- DOI minted for credit and citation

Individual Researcher/ Team Sharing and Reuse

- Covers single publication or trial
- Recognizes life cycle of grant is not the same as life cycle of sharing
- DOI minted for credit and citation

Vivli Diverse Membership

abbvie

Summary: Benefits of Sharing through Vivli

- **Ease of sharing** - Sharing de-identified data is facilitated through either institutional memberships in Vivli or individually per dataset
- **Citation** – DOIs allow for citation and credit of your research data
- **Metrics** – Yearly metrics on number of data requests, resulting publications, etc.
- **Long-term archiving** – Archive your trials on Vivli (at least 25 years)
- **Post-grant data sharing** – Management of IPD sharing that continues even after grant funds end
- **Funder and journal mandates** – Easily fulfill requirements for data sharing plans

CENTER FOR GLOBAL CLINICAL RESEARCH DATA

How to Access Data in Vivli?

Secure Environment Bridges Multiple Platforms

Vivli Secure Environment

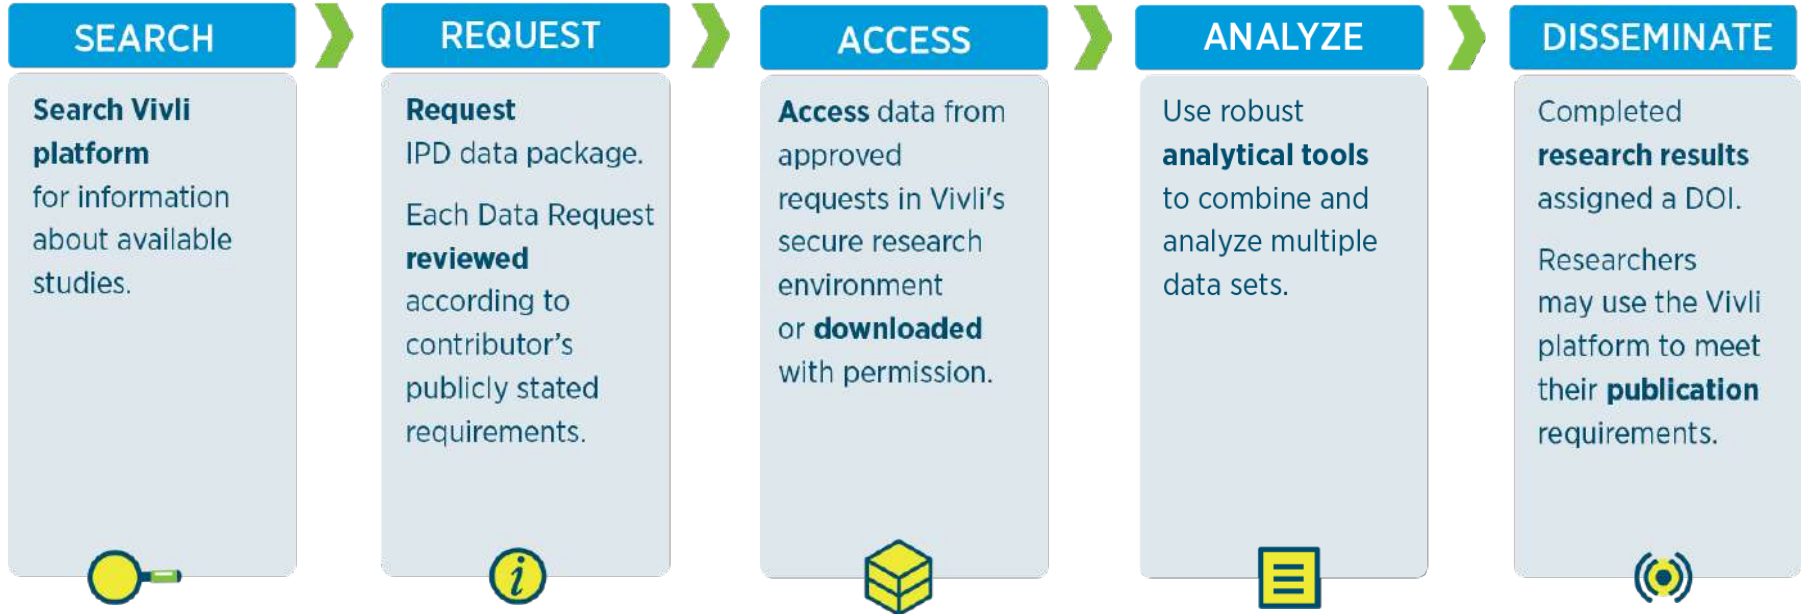

- STATA
- MS Office
- R
- Jupyter Notebook
- Python
- SAS

Vivli is a Global Data Platform – Agnostic to Disease, Funder or Data Contributor

Irritable Bowel Syndrome
Bacterial Peritonitis Glaucoma Endometriosis
Kidney cancer Non Hodgkins Lymphoma Epilepsy HIV
Breast cancer Cystic Fibrosis Diabetes Mellitus Insomnia
Coronary Artery Bypass Surgery Schizophrenia Bariatric Obesity
Atrial Fibrillation Fibromyalgia Cancer Traumatic Brain injury Trauma
Huntington's Disease Dabigatran
Influenza Crohn's Diabetes Hepatitis CHepatitis Autism
Atorvastatin Hidradenitis Disease Hypertension Myocardial Arthritis
Psoriasis Statin Endometriosis Depression Interleukin-6 Zoloft
Tysabri Tuberculosis Heart-Failure
Bipolar disorder Cannabinoids Asthma Lung cancer Lymphoma
Multiple Sclerosis Sickle Cell disease Atopic Dermatitis
Tumor burden Vitamin D Total Joint Replacement Cancer
Vedolizumab Pulmonary Arterial Hypertension Infarction
Hemophilia Sleep Apnea Edoxaban Type 1 Diabetes Mellitus
HPV Humira Colorectal Cancer Osteoarthritis
Lymphoma Stroke Ulcerative Colitis Vitiligo

Data Request and Access Process

Log on to
