1.0 Data Access Introduction

Your team's data request has been approved and your Data Use Agreement has been executed. Now that one of the studies from your request has been uploaded, your research team is able to begin analyzing the data. Depending on the access options available on your requested study(ies), you can either download the data ([See section 12.0](#) for more information) or you can access the data via a secure, cloud-based, isolated workspace known as a research environment.

- The Research Environment is a where users have access to various tools to analyze their data and conduct their research, including [R](#), [Python](#), [Jupyter](#), the Microsoft Office suite, STATA, and [SAS \(Academic-license only\)](#) depending on the type of the Research Environment selected. A [complete list of the software](#) included and versions in the Research Environment can be found on the Vivli website resources page.
- The Vivli Research Environment can also accept your own preferred analytical tools if you can provide the license key for the tool, or if it is an open-source tool. Publicly available R packages or Python scripts can be added by the Vivli team.

2.0 Before you start the secure research environment

- To access the research environment, your computer must have a tool called Remote Desktop. This tool opens a connection to the research environment and allows you to interact with the research environment as though it were your local machine.
- On Windows: Remote Desktop tool is already installed on the machine - no setup is required.
- On Macintosh: users will need to go to the Apple Store. Download and install the Microsoft Remote Desktop.

Search Results for "microsoft remote desktop"

Figure 1 – Microsoft Remote Desktop

- Some networks may have enhanced security controls that prevent users from accessing the research environment. For help, contact support@vivli.org.

3.0 Getting Started

- Once one of your requested studies data packages has been uploaded, you will be notified via email that your data is available.
- At this point, you may initiate the Secure Research Environment. Please note that only the "Owner" of the data request can start the Research Environment.

3.1 Locating the Data Request and seeing how many studies are available for analysis

1. Click on **My Data Requests** in the top right corner of the screen:

Figure 2 - My Data Requests

2. The request will appear under **Active**:

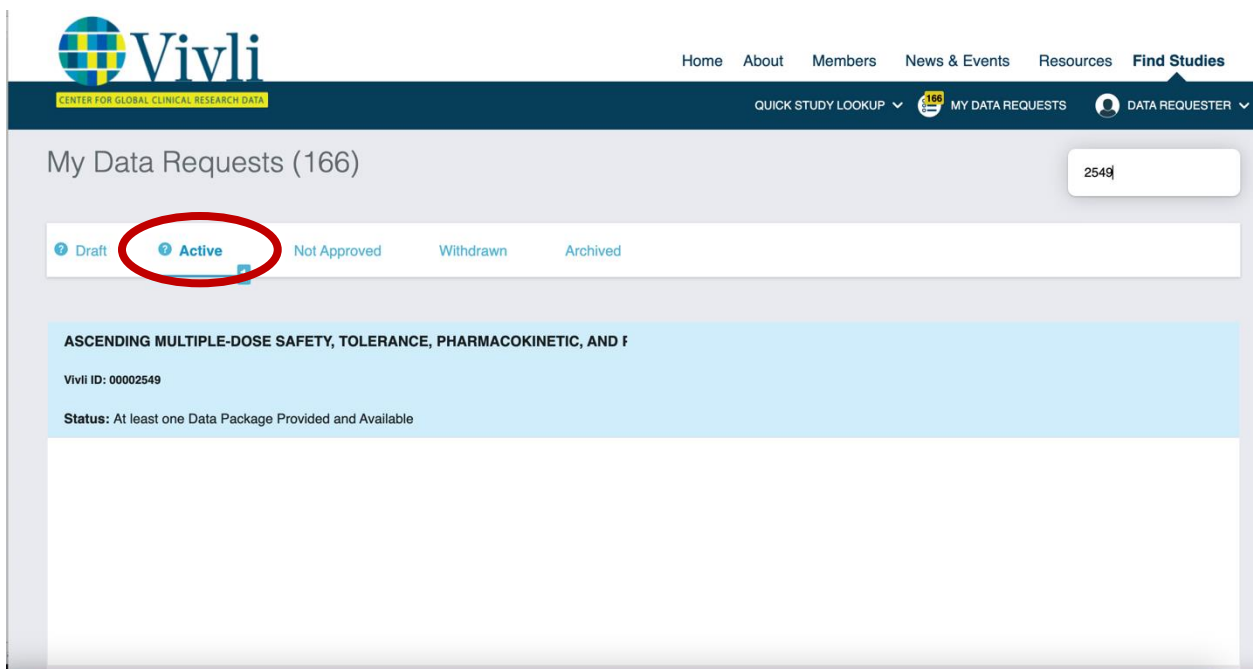

Figure 3 - Fulfilled Requests

3. If the request has been approved, the Data Use Agreement validated and the requested data from at least one requested study is available, the request will appear under “Active”, with a status of “At least one Data Package Provided and Available”

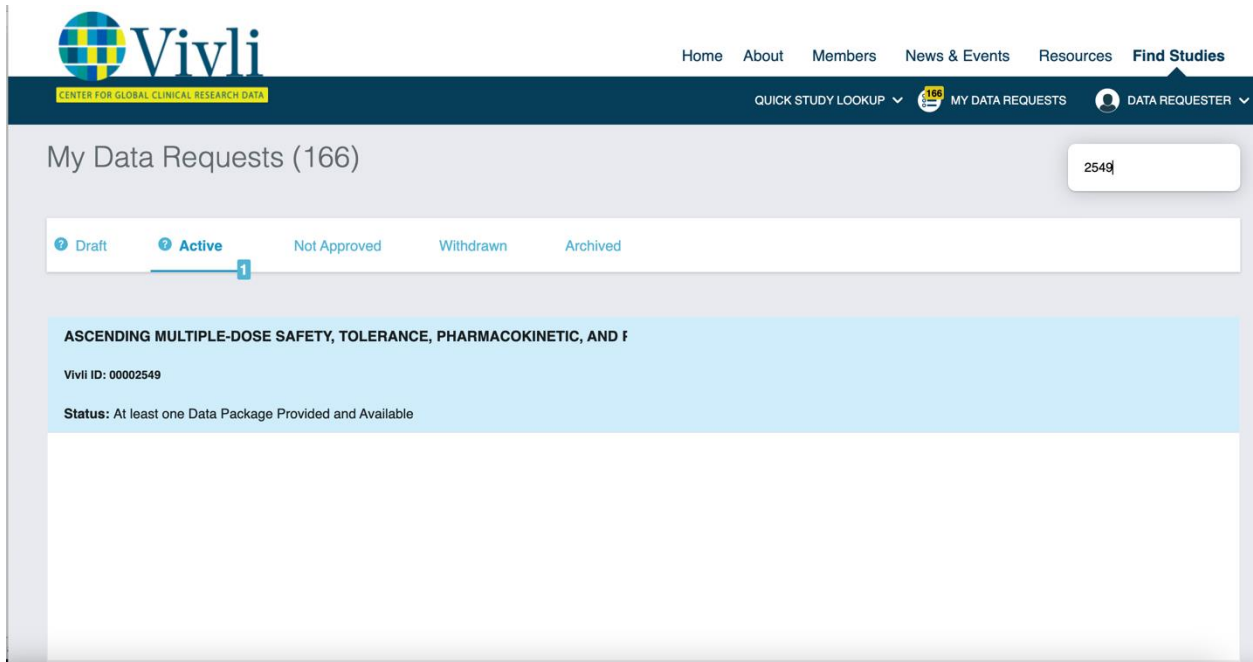

Figure 4 – At least one Data Package Provided

To determine **which** studies have been loaded, open the request and click on the Studies tab:

The screenshot displays the Vivli web application interface. At the top, the Vivli logo is on the left, and navigation links (Home, About, Members, News & Events, Resources, Find Studies) are on the right. Below the logo, a dark blue bar contains 'QUICK STUDY LOOKUP', 'MY DATA REQUESTS' (with a 166 icon), and 'DATA REQUESTER'. The main content area is titled 'Ascending Multiple-dose Safety, Tolerance, Pharmacokinetic, and Pharmacodynam...' with a 'Print' button. A left-hand menu lists various options: Studies, Attachments, Request History, Signed Agreements, Safety Concerns, Chat, Research Team, Research Environment, and Request Details/Print View. The central section, 'VIVLI-LISTED AND PROVISIONED STUDIES', shows four study entries. The first three studies are in a light blue box and have a status of 'Awaiting Data Package upload by Data Contributor'. The fourth study is in a white box and has a status of 'Data Package Provided to Requestor'. Each entry includes details like PI, Sponsor, Study ID, IRP/Approver, Data Request ID, Sponsor ID, Data Contributor, and IPD Upload status. The bottom of the page features a dark blue footer with links for 'How To Guide', 'Privacy', 'Cookie Policy', 'EEA Disclosure Policy', and 'Contact Us', and a copyright notice for Vivli.

Figure 5 – Data Package Provided to Requestor

If you start the research environment before all of the data is available, then as additional data is made available, it will not automatically appear in the research environment– you will have to request that the new data be added to your research environment at a time that is convenient for you– see section “6.2 How to add additional data to your research environment as it becomes available”

3.2 Starting the Secure Research Environment

Once you have opened your request, click on the **Research Environment** tab on the left-hand side of your screen to begin initiating the environment. Please read and acknowledge the Vivli Terms of Use for the Research Environment. Click on **Sign Now**:

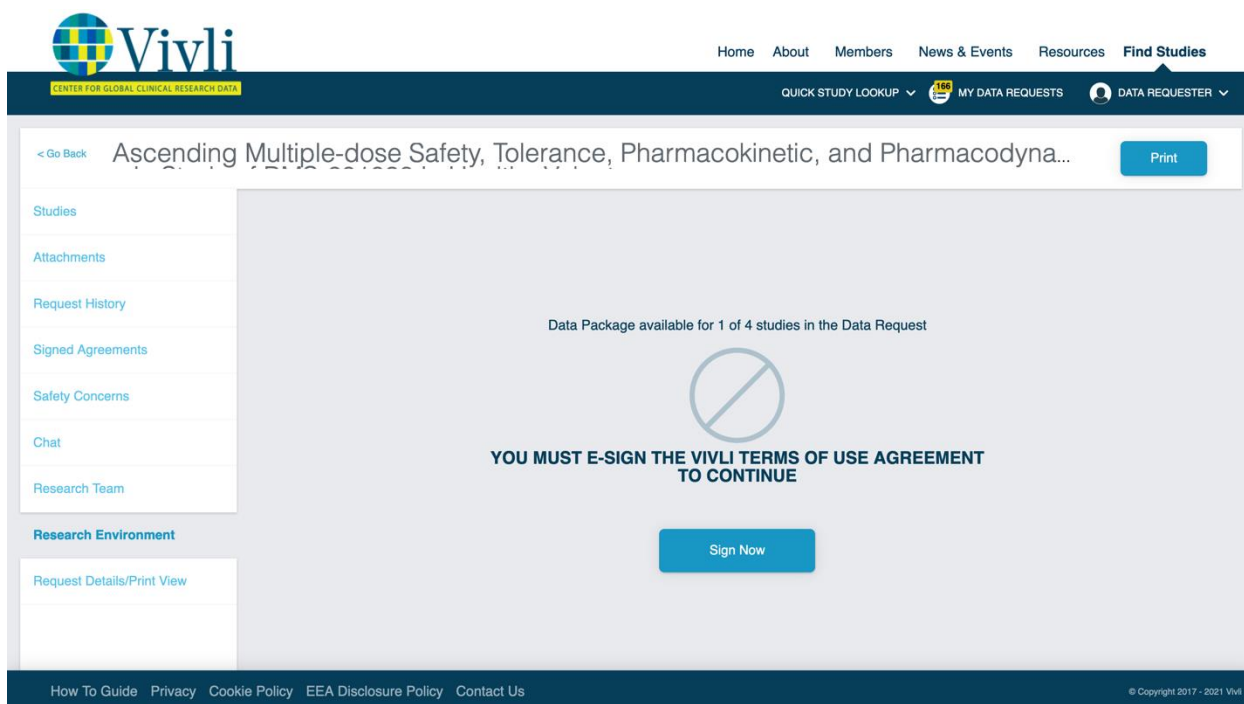

Figure 7 – Start Signing Process

4. The following pop-up window will appear:

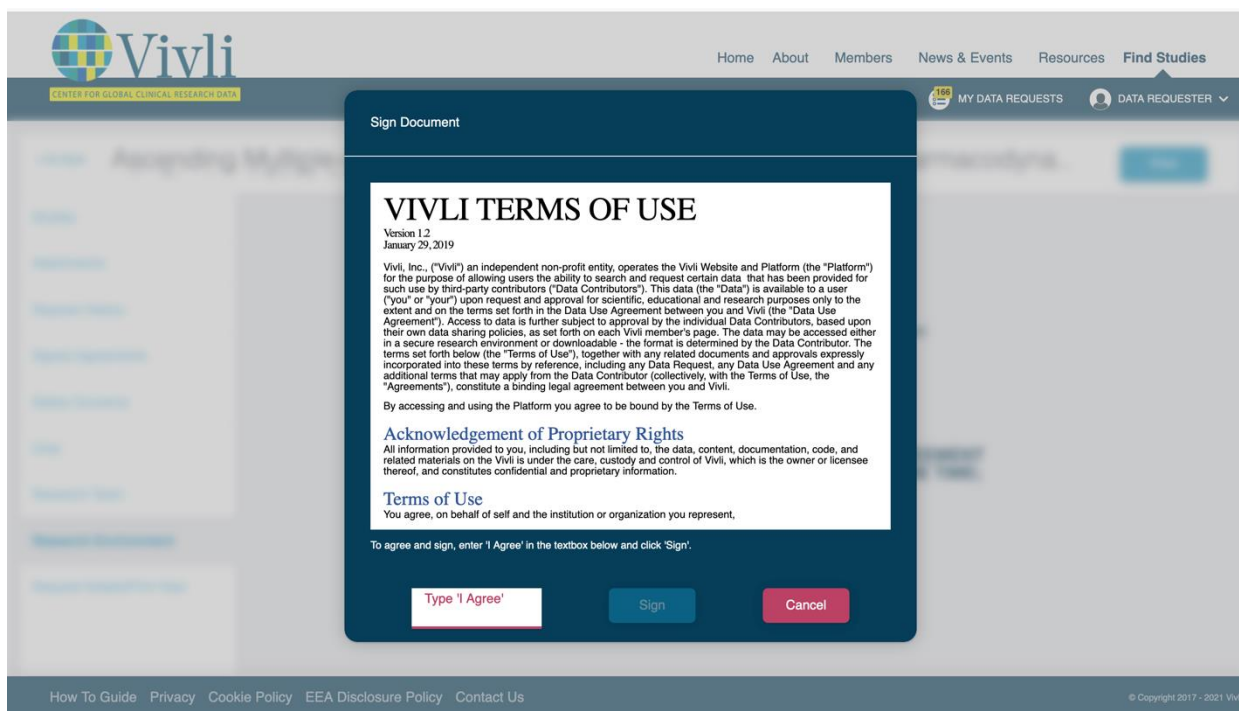

Figure 8 - Terms of Use Pop-Up

5. Type **I Agree** in the dialogue box and click **Sign**.
Each Team member accessing the Research Environment must Sign the Terms of Use when they first access the Research Environment.

The screenshot shows the Vivli website with a 'Sign Document' dialog box open. The dialog box contains the following text:

VIVLI TERMS OF USE
Version 1.2
January 29, 2019

Vivli, Inc., ("Vivli") an independent non-profit entity, operates the Vivli Website and Platform (the "Platform") for the purpose of allowing users the ability to search and request certain data that has been provided for such use by third-party contributors ("Data Contributors"). This data (the "Data") is available to a user ("you" or "your") upon request and approval for scientific, educational and research purposes only to the extent and on the terms set forth in the Data Use Agreement between you and Vivli (the "Data Use Agreement"). Access to data is further subject to approval by the individual Data Contributors, based upon their own data sharing policies, as set forth on each Vivli member's page. The data may be accessed either in a secure research environment or downloadable - the format is determined by the Data Contributor. The terms set forth below (the "Terms of Use"), together with any related documents and approvals expressly incorporated into these terms by reference, including any Data Request, any Data Use Agreement and any additional terms that may apply from the Data Contributor (collectively, with the Terms of Use, the "Agreements"), constitute a binding legal agreement between you and Vivli.

By accessing and using the Platform you agree to be bound by the Terms of Use.

Acknowledgement of Proprietary Rights
All information provided to you, including but not limited to, the data, content, documentation, code, and related materials on the Vivli is under the care, custody and control of Vivli, which is the owner or licensee thereof, and constitutes confidential and proprietary information.

Terms of Use
You agree, on behalf of self and the institution or organization you represent,

To agree and sign, enter 'I Agree' in the textbox below and click 'Sign'.

At the bottom of the dialog box, there is a text input field containing the text 'Type 'I Agree'' and 'I Agree!'. This field is circled in red. To the right of the input field are two buttons: 'Sign' (blue) and 'Cancel' (pink).

The background of the page shows the Vivli logo and navigation links: Home, About, Members, News & Events, Resources, Find Studies. There are also links for 'MY DATA REQUESTS' and 'DATA REQUESTER'.

Figure 9 - Terms of Use Read, Acknowledge and Sign

3.3 Secure Research Environment Options

1. After you agree to the Terms of Use, the following options window will appear:

The screenshot shows the 'RESEARCH ENVIRONMENT DETAILS' window. At the top, it states 'Data Package available for 1 of 1 studies in the Data Request' and 'Once the machine is started, the request cannot be sent back for revision'. A red circle highlights the text 'Before starting the Research Environment, read the short introduction [here](#).' Below this, there are two columns: 'Standard Environment' and 'Premium Environment'. The 'Advanced Options' checkbox is unchecked. The table below compares the two environments across several criteria.

	Standard Environment	Premium Environment
Initial Cost	No charge for 365 days	No charge for 90 days
After Initial Period	\$12/Day after 365 days, 2 concurrent logins	\$25/Day after 90 days, 2 concurrent logins
Machine Size	2CPUx7GB	4CPUx14GB
Jupyter Notebook	✓	✓
Python, R	✓	✓
STATA	<input type="checkbox"/>	<input type="checkbox"/>
Academic license for SAS		<input type="checkbox"/>

At the bottom, there are two buttons: 'Start Standard Environment' and 'Start Premium Environment'.

2.. Most research teams find that the standard environment meets their needs. If you need a larger environment, the Premium will normally suffice.

2b. If you need a dramatically larger environment, choose Advanced Options for additional environment size types. Please note that if you choose a larger size, you cannot move to a smaller size, but you can start with a smaller size and upgrade to a larger size research environment. In addition, the no charge period will change based upon the larger machine size that is used and will take into account the no charge time already provided. For example, if you move from a standard to a premium, after 90 days, you will not be entitled to a further 90 days of no charge.

The screenshot shows the 'RESEARCH ENVIRONMENT DETAILS' window. At the top, it states 'Data Package available for 2 of 5 studies in the Data Request' and 'Once the machine is started, the request cannot be sent back for revision'. Below this, there is a link to read the short introduction. The 'Advanced Options' checkbox is checked. The table below compares five environment types: Premium, Large, Compute Optimized, Memory Optimized, and Compute Optimized (I). The 'Initial Cost' and 'After Initial Period' rows show the pricing for each environment. The 'Machine Size' row shows the number of CPUs and GB of memory. The 'Jupyter Notebook', 'Python, R', 'STATA', and 'Academic license for SAS' rows show the availability of these features for each environment.

	Premium Environment	Large Environment	Compute Optimized Environment	Memory Optimized Environment	Compute Optimized (I)
Initial Cost	No charge for 90 days	\$50/Day	\$85/Day	\$165/Day	\$190/D.
After Initial Period	\$25/Day after 90 days, 2 concurrent logins	\$50/Day	\$85/Day	\$165/Day	\$190/D.
Machine Size	4CPUx14GB	16CPUx64GB	32CPUx64GB	64CPUx128GB	64CPUx5C
Jupyter Notebook	✓	✓	✓	✓	✓
Python, R	✓	✓	✓	✓	✓
STATA	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Academic license for SAS	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

At the bottom, there are five buttons: 'Start Premium Environment', 'Start Large Environment', 'Start Optimized Environment', 'Start Memory Optimized Environment', and 'Start Memory Optimized (I)'.

4. Select the research environment appropriate for your needs and check the boxes as desired for the software you require and click the button “Start Environment”.

As you consider which environment to choose, if you don't want to use SAS, but if the data is provided as SAS data, the system includes three R-studio packages that can help:

- Foreign
- Haven
- SAS7bdat

When you click the "Start..." button, your selection is final, and the provisioning will begin. For more information, contact support@vivli.org.

3.4 Initiating the Secure Research Environment

1. After selecting the size of the environment, the data will be provisioned into the Secure Research Environment. While provisioning is taking place, the following screen will appear:

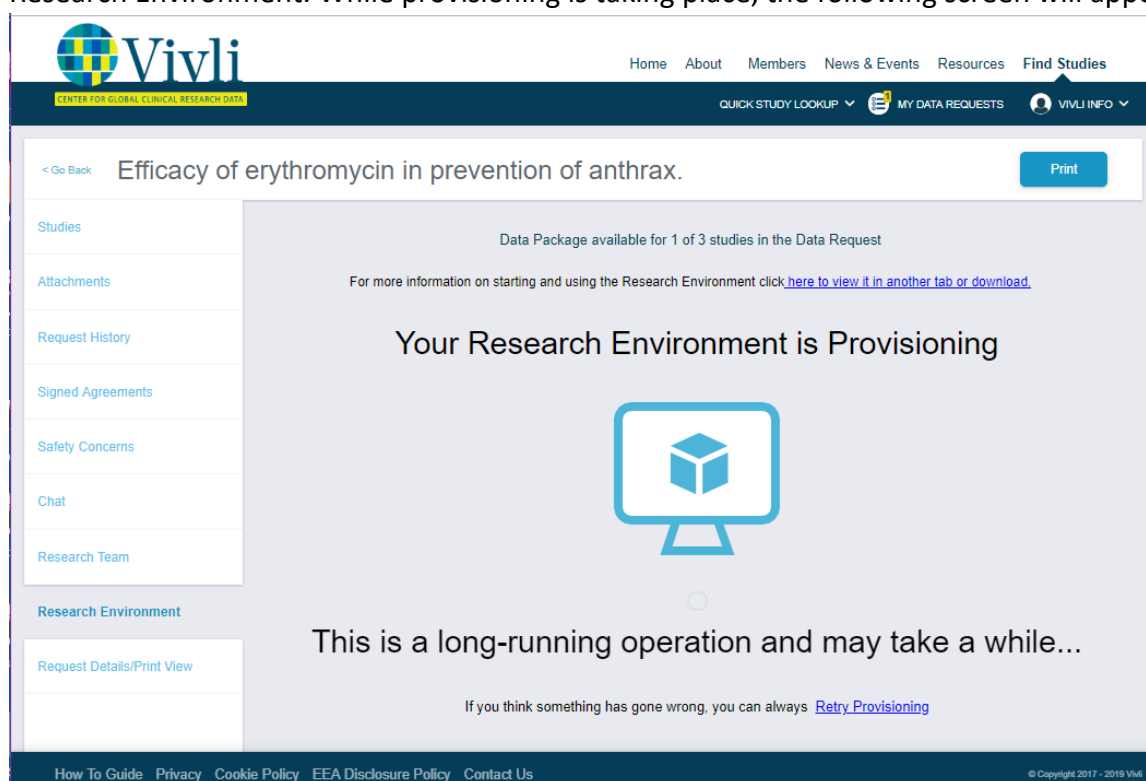

Figure 11 - Provisioning notification

2. While the system is provisioning, you can exit this screen and allow the provisioning to proceed in the background. You will receive an email when the process is complete. This process typically takes 10 minutes.

4.0 Access to the Environment

4.1 Accessing the Secure Research Environment

1. Once the provisioning is complete, you will see the screen below:

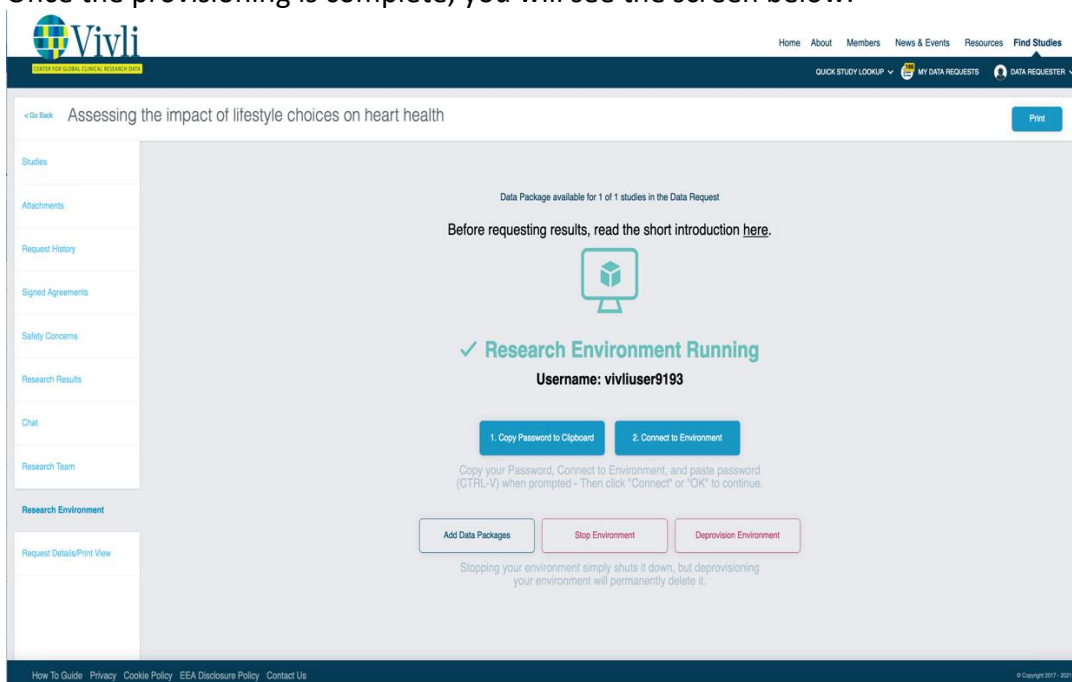

Figure 12 - Initiate Research Environment

2. Right click on the box "Copy Password to Clipboard" to copy the hidden password:

1. Copy Password to Clipboard

2. Connect to Environment

3. Then click on the box "Connect to Environment"
4. After clicking on "Connect to environment," confirm the program you want to use (note that the exact screen you see depends on the browser you are using):

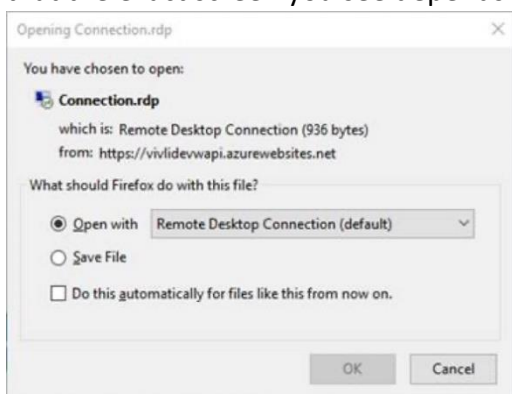

Figure 13 - Remote Desktop Connection Notification (Windows)

- Follow the prompt to enter the hidden password using the Paste tool, Control-V or Command-V:

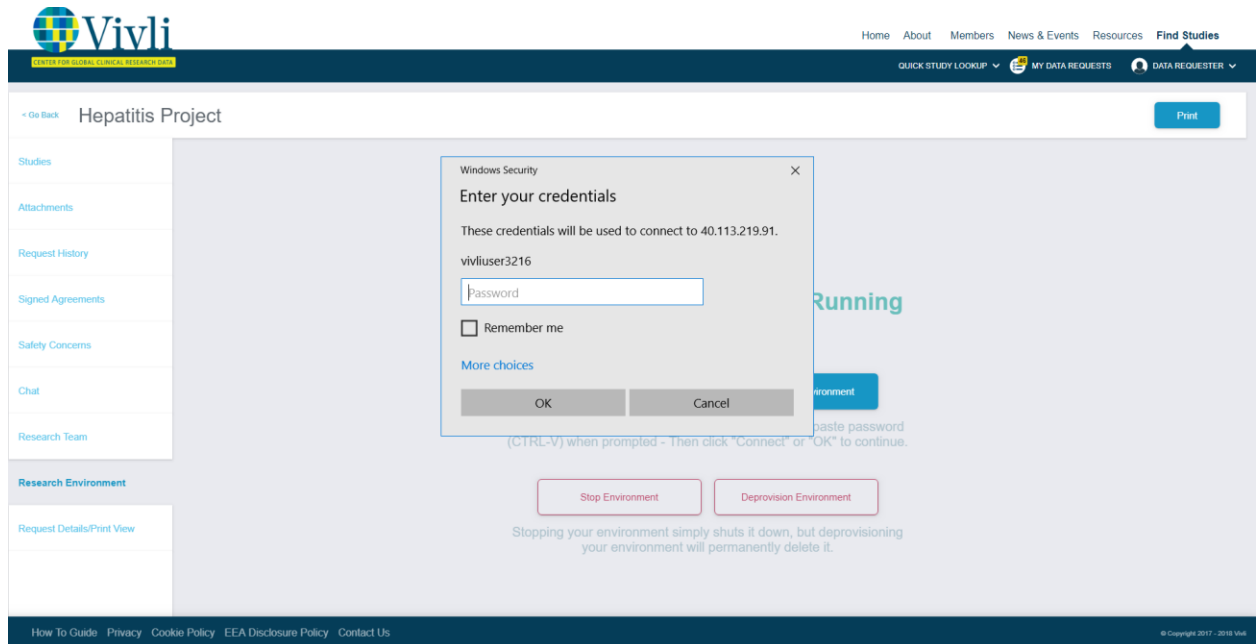

Figure 14 - Paste hidden password pop-up

The username and password **will not** match your Vivli username and password.

- Depending on your computer's security settings, a warning may appear. Click **connect** to continue opening the Secure Research Environment:

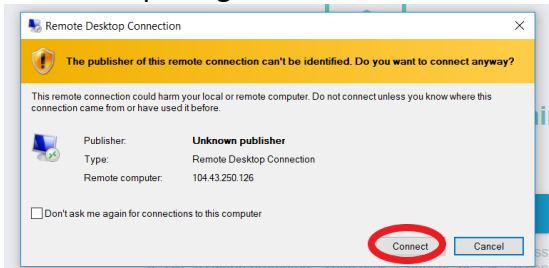

Figure 1 - Security warning pop-up

7. The secure research environment home screen opens automatically:

Figure 16 - Secure Research Environment Home Screen

- Note that the first time you connect to the Research Environment, the system will be slower than normal as the system does some first-time configuration.
- You **must** have Microsoft Remote Desktop installed on your device or the Secure Research Environment will not open. (See section 2.0 [Before You Start](#).)
- The Microsoft Remote desktop locks down the Secure Research Environment to keep the data secure. You may not bring any files directly into or out of the Secure Research Environment once it starts. You are unable to connect to the internet. And you are unable to copy and paste between the research environment and your local computer.
- Do not save the password and the Remote Desktop file and re-use them. Follow the steps above in [Accessing the Secure Research Environment](#) section 4.1 and copy the password each time and click “Connect to Environment”.

4.2 Working in the Research Environment

4.2.1 Finding your data and using space

1. Open Disk V: and you find a folder entitled “Source Data”

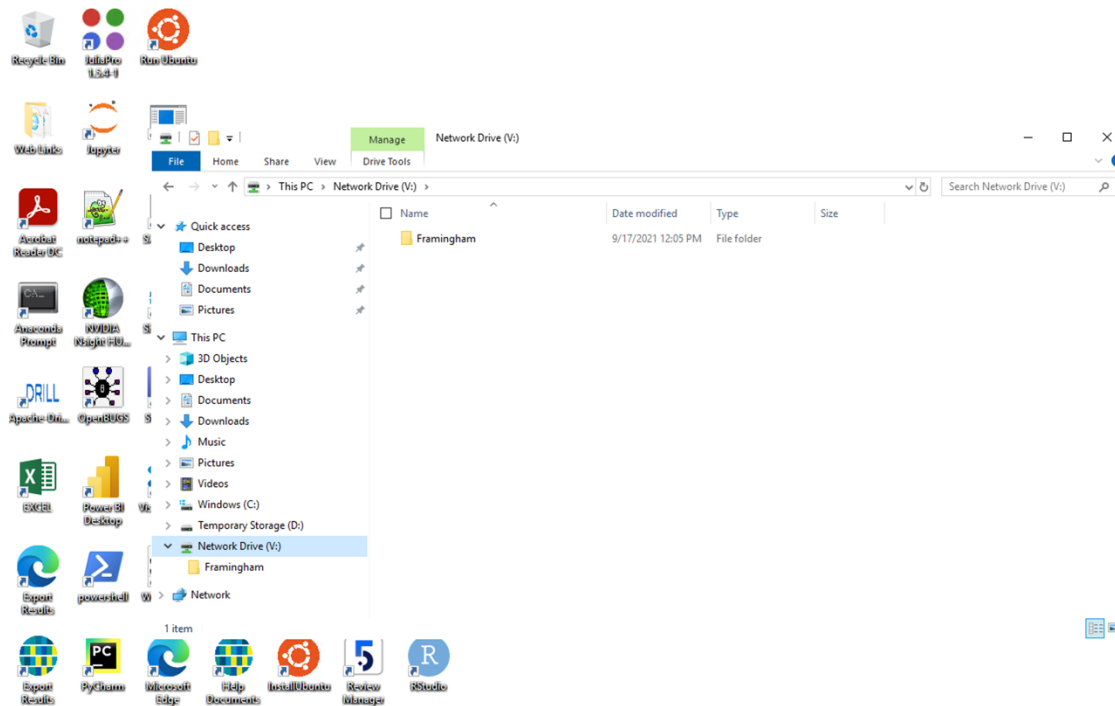

Figure 24 - Open source data

2. In the Network Drive (drive V:) you will find one folder for each study that has been provided –the folder name will be the sponsor-assigned ID. Unlisted studies will appear with the ID you used to request the study. Within the ID, some characters that are not allowed for filenames will be replaced by an underscore character, including `\.*?**<>|`

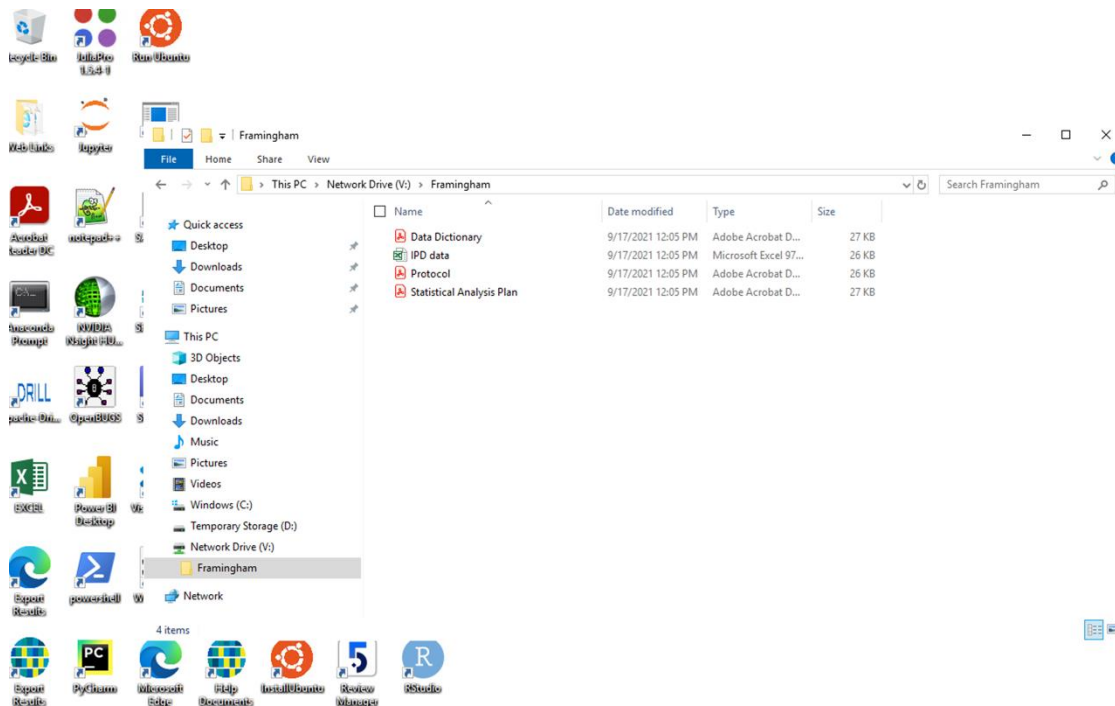

Figure 25 - Open source data – files

Do not place any important data onto the temporary storage drive D:– when the machine is stopped, even temporarily, the temporary storage will be deleted.

If the data has been provided in the form of a zip file, you can open the file as though it were a folder, and read the files in the zip file, but you will not be able to modify them in-place. To modify the files, you will need to copy the file(s) to a new, un-zipped folder.

Additional network space will expand as you add files, up to a terabyte. We recommend that you not put anything but transient data onto C: drive. Data on the V: drive will be placed into long-term storage after you have completed your analysis. If you have questions about the data and what has been provided, use the Chat function within the Vivli platform or email support@vivli.org; Please direct questions about the source data to the data contributors. Responses to questions about the source data is at the discretion of the data contributor.

4.2.2 If you started before all of the data was available

If you have decided to start before *all* of the data is available, then when additional data is provided by the contributor, it won't be added to your research environment automatically. [See Section 6.0](#) for instructions on how to load newly provided data.

4.2.3 Additional Tips for working in the Research Environment

Normally, remote desktop will start up in full screen mode, with a small control on the top of the screen:

Figure 59 - Remote Desktop Control Bar

You can drag this control bar from side to side if needed, and you can also use this toolbar to minimize the secure research environment screen, if you need to access the Vivli platform, your email, or any other applications.

1. To minimize the window but keep it visible, click on the minimize option in the toolbar:

Figure 60 - minimize window

2. To collapse the window entirely, click on the collapse option in the toolbar:

Figure 61 - collapse window

4.3 Disconnecting from the research environment

- When you are done working with the research environment, we recommend that you Sign Out – this will allow other members of the research team to use the research environment.

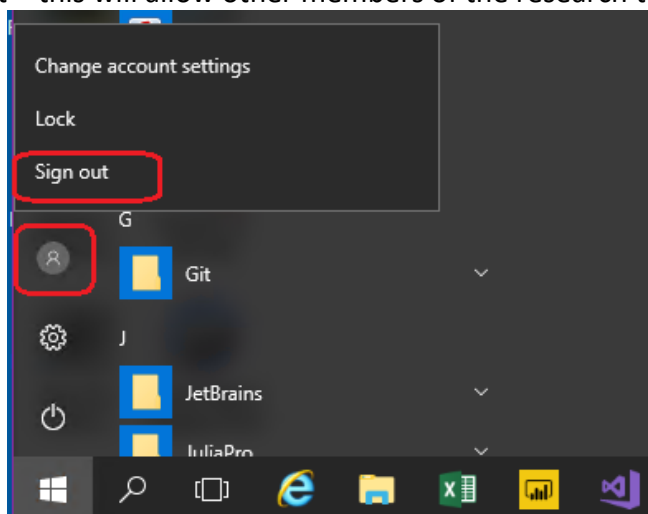

Figure 17 – How to Sign-out

- Only two team members can use the Secure Research Environment at a time. If a third member tries to log on, they will be given the option of disconnecting a team member:

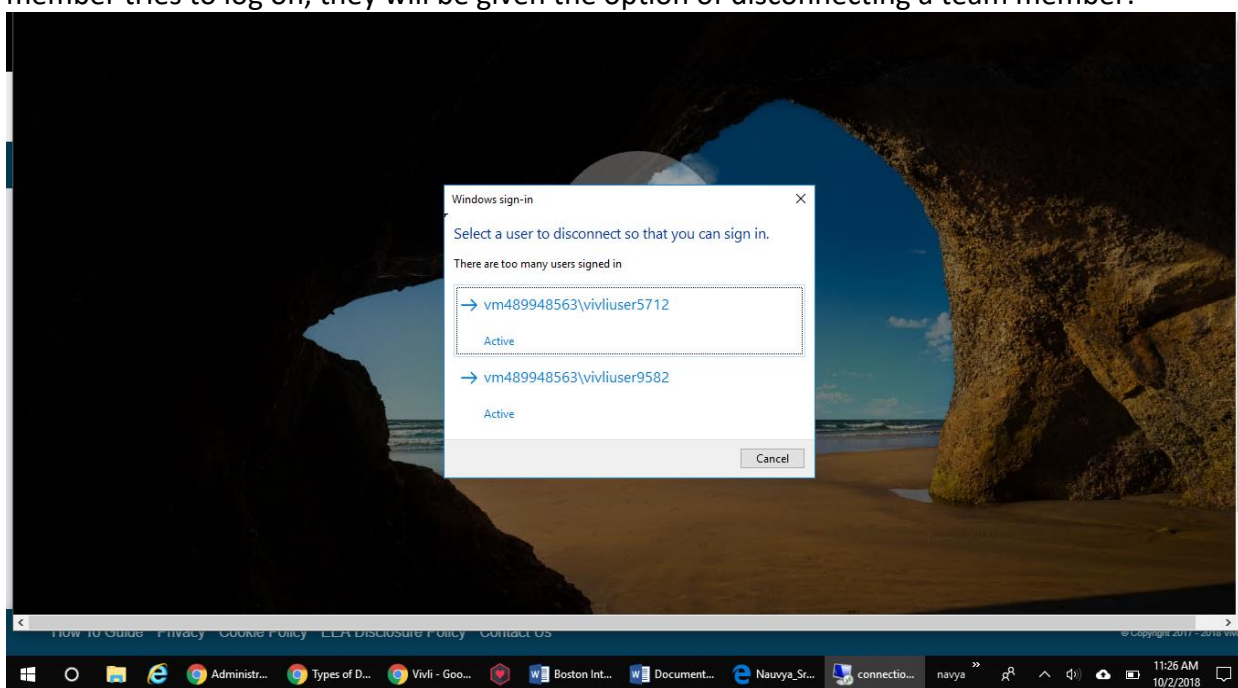

Figure 18 - too many users signed on

- The user that you select will be automatically disconnected:

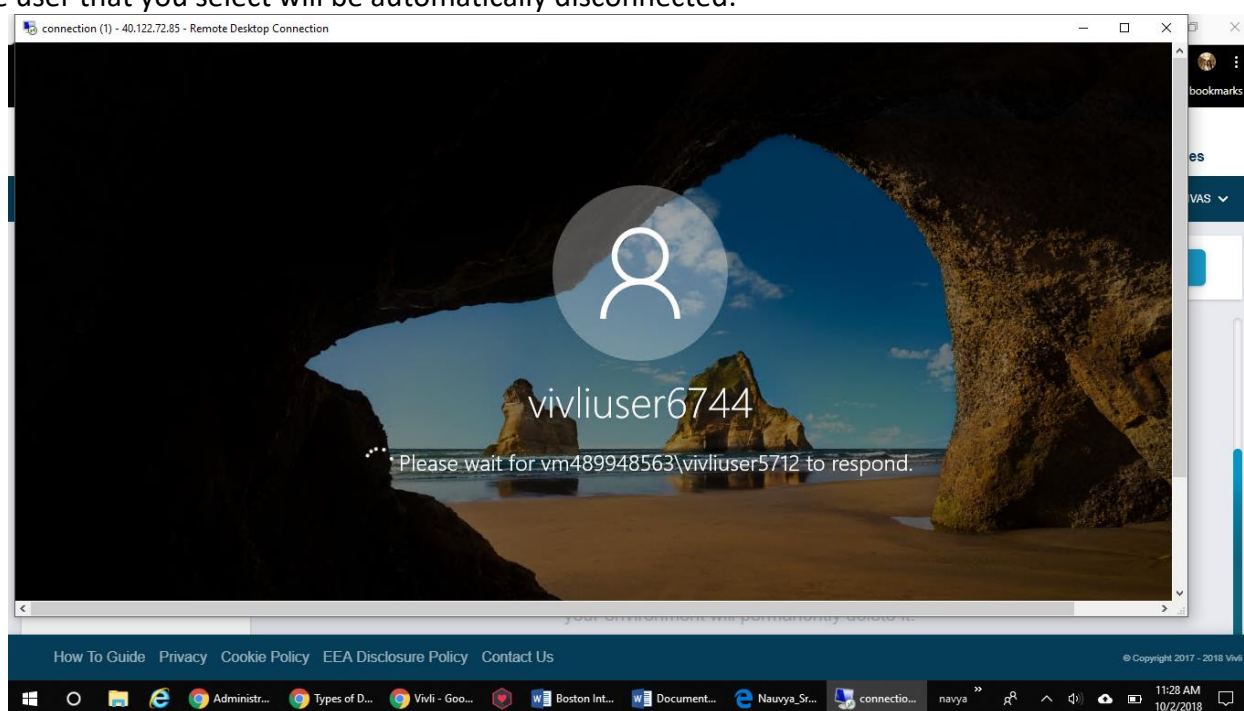

Figure 19 - disconnecting user

- The user in the research environment will receive the following message:

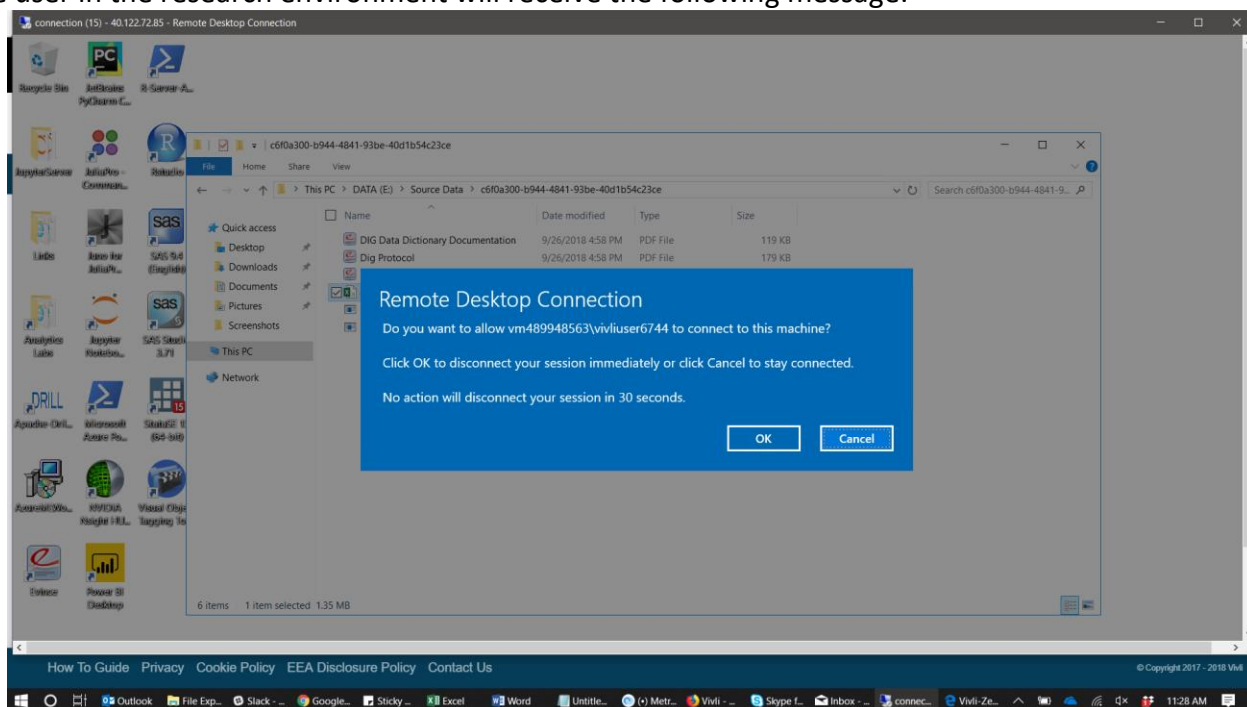

Figure 20 - change user notification

- The user in the research environment must click **OK** to disconnect and allow their team member access. Save your work regularly, and especially before disconnecting.

4.4 Team Access to Secure Research Environment

- All members of the research team working in the research environment must have a signed Data Use Agreement (DUA). If a research team member is part of the same institution as the Principal Investigator, they are covered under the Principal Investigator's DUA. If a team member is from another institution, they must sign a DUA before accessing the research environment.
- The data request administrator may add team members and may invite any of the team members to access the data request, which also grants access to the Research Environment.
- To invite a user, the user being invited must first create an account using the "Sign-up" link on the initial page. For information on creating an account, see the [User Quick Start Guide](#)
- Once the Research team member creates a Vivli Account, the data request administrator may invite any of the team members to access the data request and the research

environment.

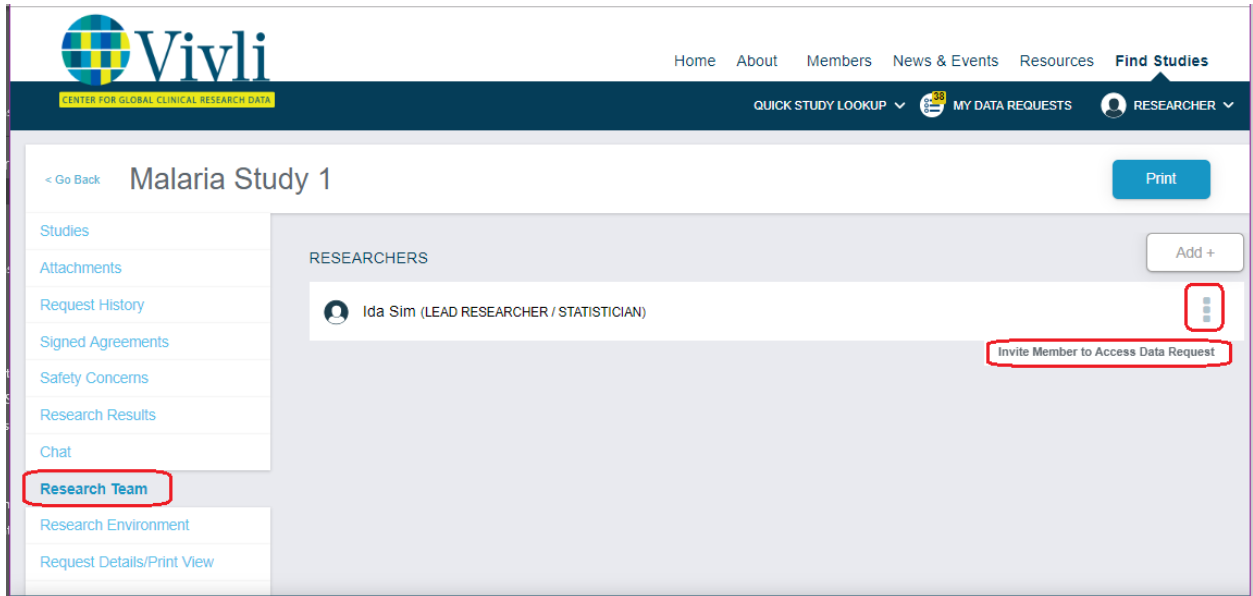

Figure 21 - change user notification

- When the research team members accept that invitation, the data request will appear on their “My Data Requests” screen and they will be given access to the data request. Once Vivli has validated that they are covered by a signed Data Use Agreement, they will be given access to the research environment.
- To remove a team member who is no longer involved in the project, click on the three dots to the right of their name, and click on “Remove Team Member”

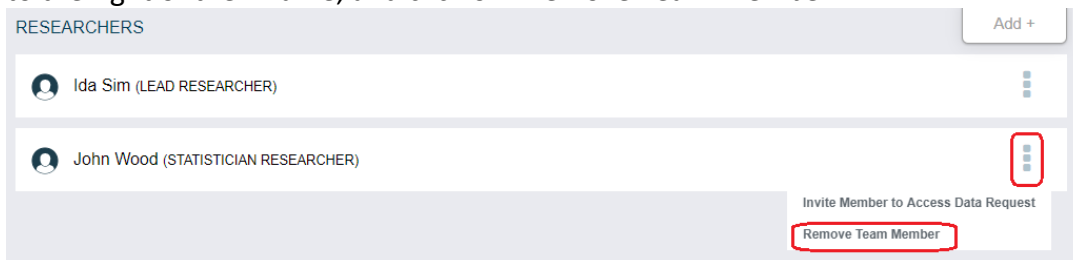

Figure 22 - change user notification

- Reminder: you are unable to change the Principal Investigator or the Lead Statistician. If you need to change the statistician or Principal Investigator, contact support@vivli.org.

4.5 Adding additional software, tools and data during your analysis

During the course of your analysis, if you find that you need to load R scripts from the CRAN repository, you can do that yourself using the following steps:

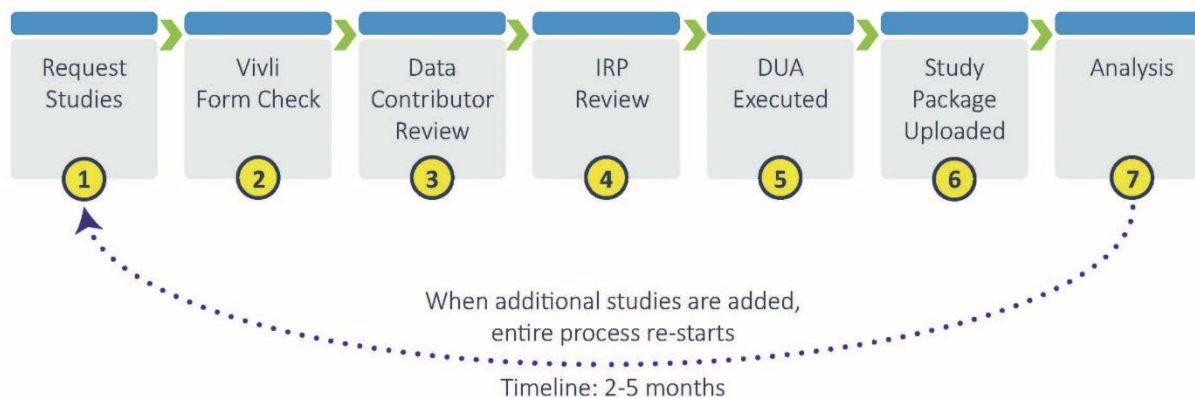

- To install a CRAN package in R, use the `install.packages()` function. This simple command downloads the package from a specified repository (by default, CRAN) and installs it on your machine
or
- In RStudio go to Tools → Install Packages and in the Install from option select Repository (CRAN) and then specify the packages you want

If you need any other R or Python scripts not pre-installed in the Vivli Research Environment, reach out to Vivli via chat or support@vivli.org and let them know the names of the additional scripts that you require and they will add them to your research environment. Any scripts that you have written or github packages can be emailed to support@vivli.org and they will be added to the research environment; please include the request number of your environment to help Vivli locate the correct environment.

If you have additional software, please email Vivli at support@vivli.org with the name of the software and any license key, if required. If this software was not included in your request, Vivli will need to reach out to the data contributors involved and ask for their agreement to include this software or data.

If you wish to add additional study data that is available on Vivli after your request is approved, you will need to submit a new request. Please note that this process can take an additional 2-5 months for review, approval and uploading of the additional data. Vivli strongly recommends that all studies needed for analysis are included before submitting your data request.

Adding Additional Studies once your Data Request is in the Analysis Stage

5.0 Stopping and Starting the Research Environment

5.1 Stopping or Pausing the research environment

- Stopping the research environment is like powering off your laptop: nothing is lost, and the environment can be restarted quickly (less than 5 minutes).
- If you expect to leave the research environment idle for several days or longer, we recommend that you stop the Research Environment.
- When you are ready to use the Research Environment again, you may restart it and the environment will be restarted with all the saved data as you left it.

To Stop the Research Environment:

1. Login to the Vivli Platform
2. Navigate to the Research Environment, and click on the button “Stop Environment”:

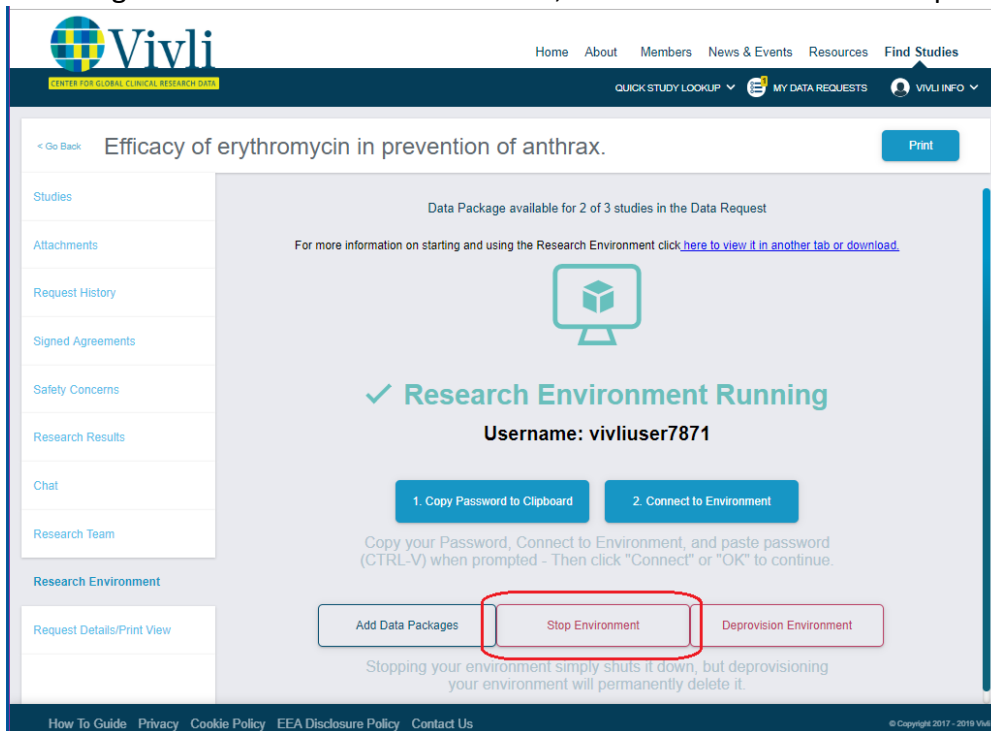

Figure 31 – Stop Research Environment

This will stop the secure research environment.

5.2 Restarting the research environment

To restart the research environment:

1. Login to the Vivli Platform
2. Navigate to the research environment:

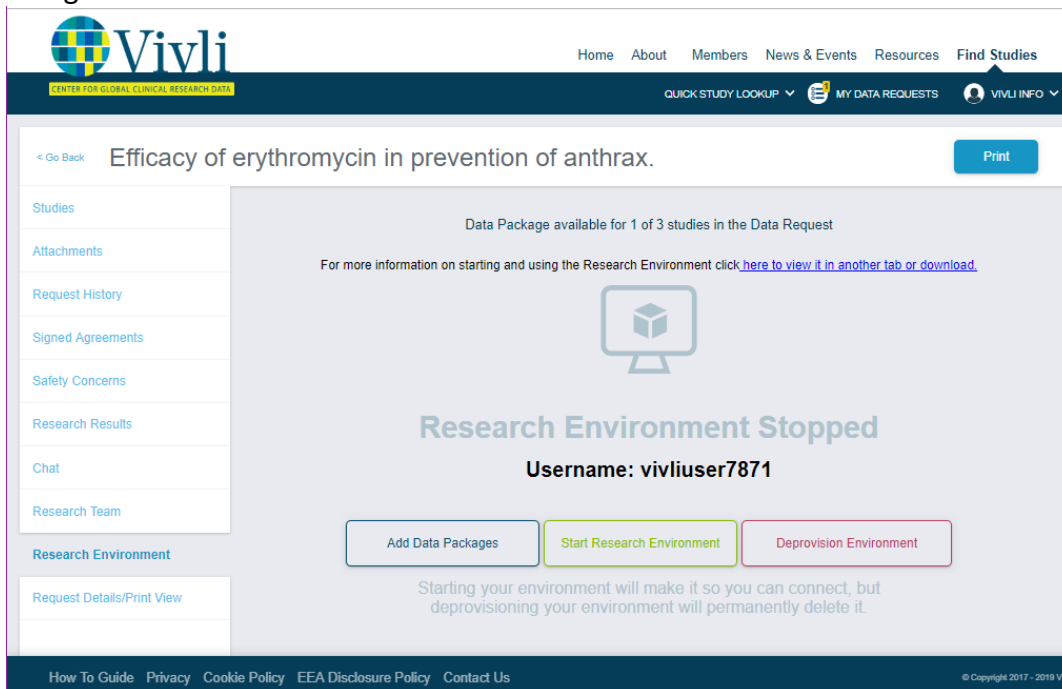

Figure 32 - Start Research Environment

3. Click on **Start Research Environment** – the platform will tell you that the research environment is starting:

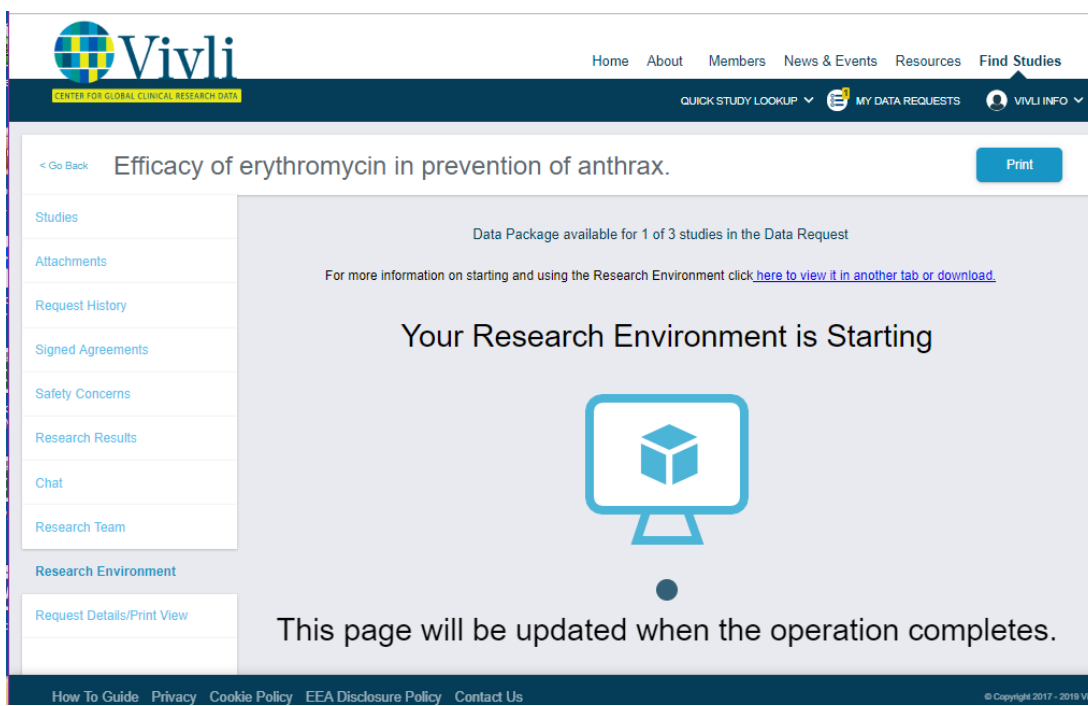

Figure 33 - Research Environment restarting

After approximately 5 minutes, the system will display the “Running” screen:

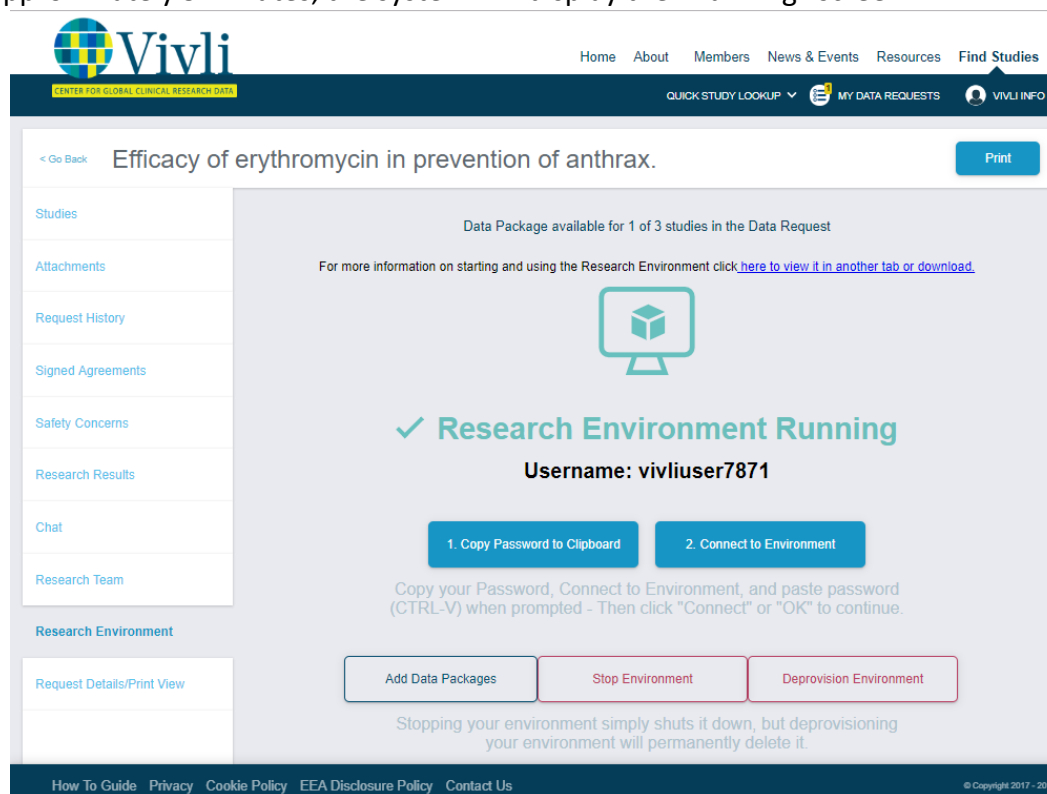

Figure 34 - Research Environment running

After restarting the machine, the first login may take a few minutes.

6.0 Adding Data Packages to the Research Environment

If you started the Research Environment before all the data was provided, then as additional data packages are loaded into the system, they will not be placed into your Research Environment automatically. You will however receive an email notification that additional data has been provided. When you are ready, you can ask the system to add the additional data packages to your Research Environment.

6.1 How will you know when data is available?

As additional data packages are loaded into the system and made available, you will receive an email notification. Within the Vivli Platform, you can look at the “Active” tab, select the request you are interested in:

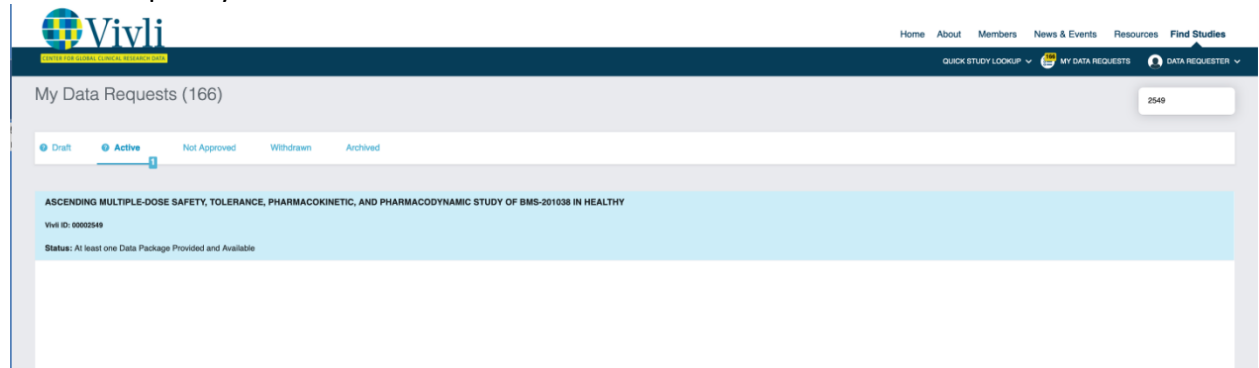

Figure 35 – Available data packages

To determine **which** studies have been uploaded, click on the studies tab, and this page will provide a status of each study:

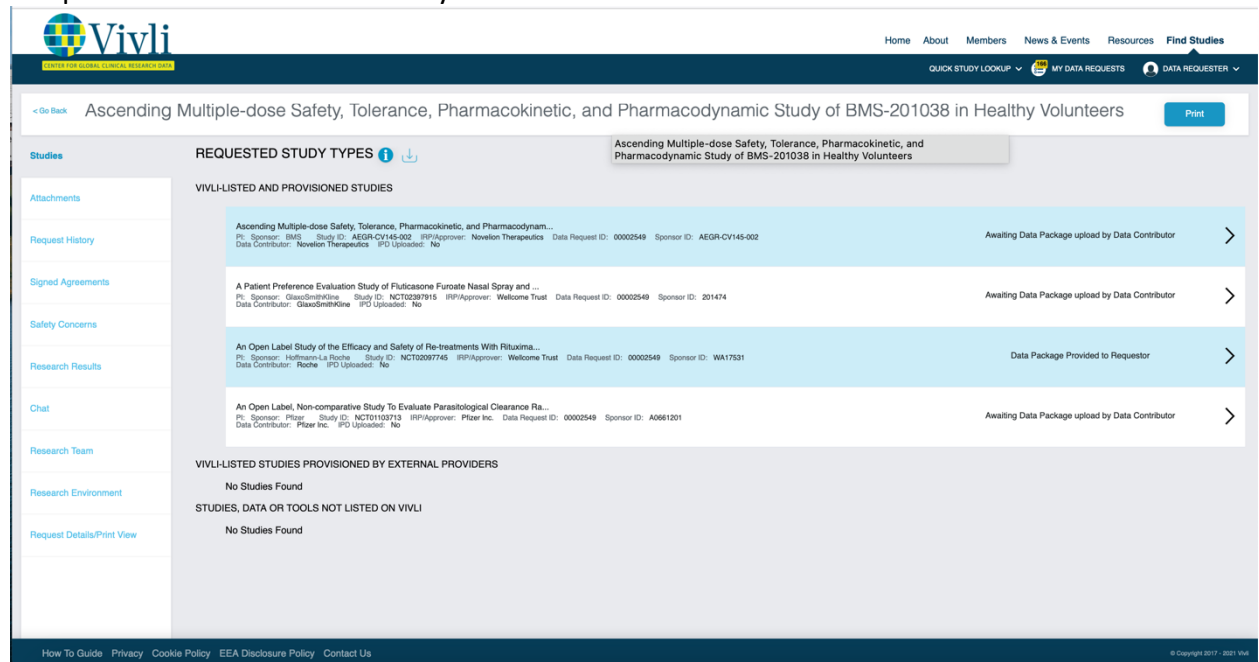

Figure 36 – Available data packages

6.2 How to add additional data to your research environment as it becomes available

Once you have determined that you are ready to ask the platform to load the additional data into your research environment, open the data request, select the Research Environment tab, and click on the “Add Data Packages” button:

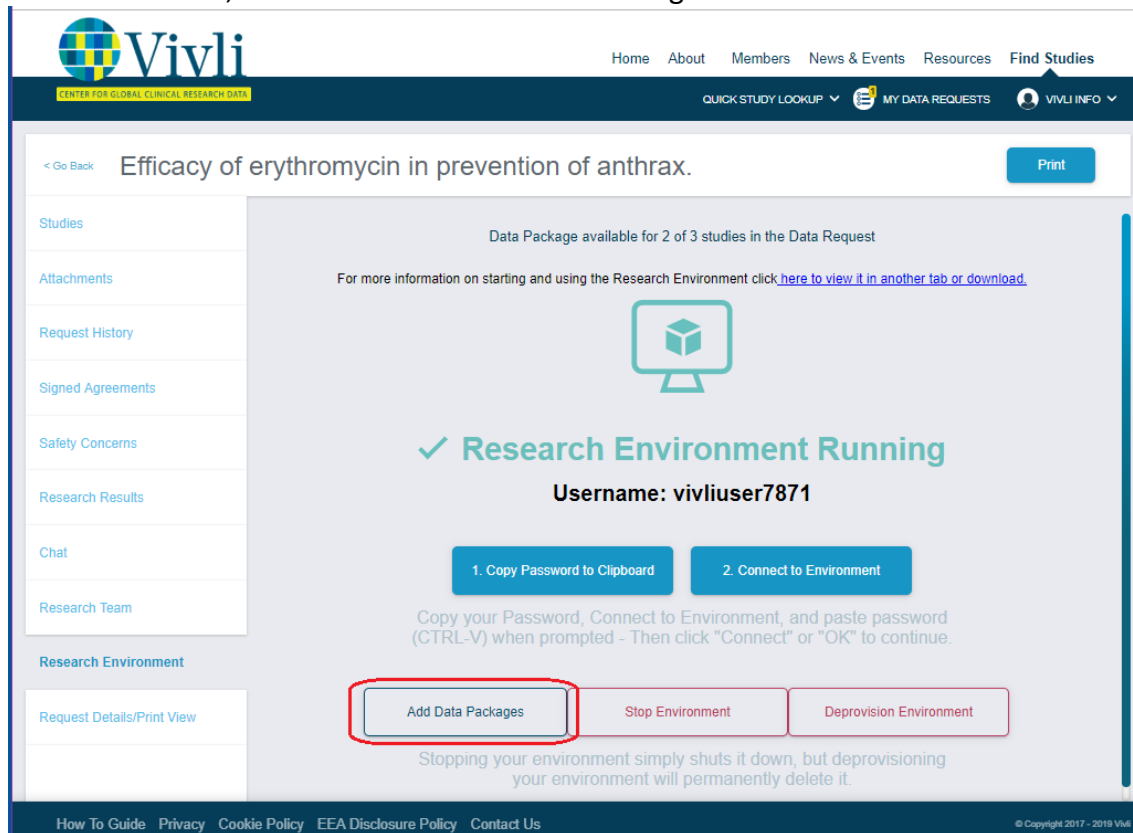

Figure 37 – Add data packages

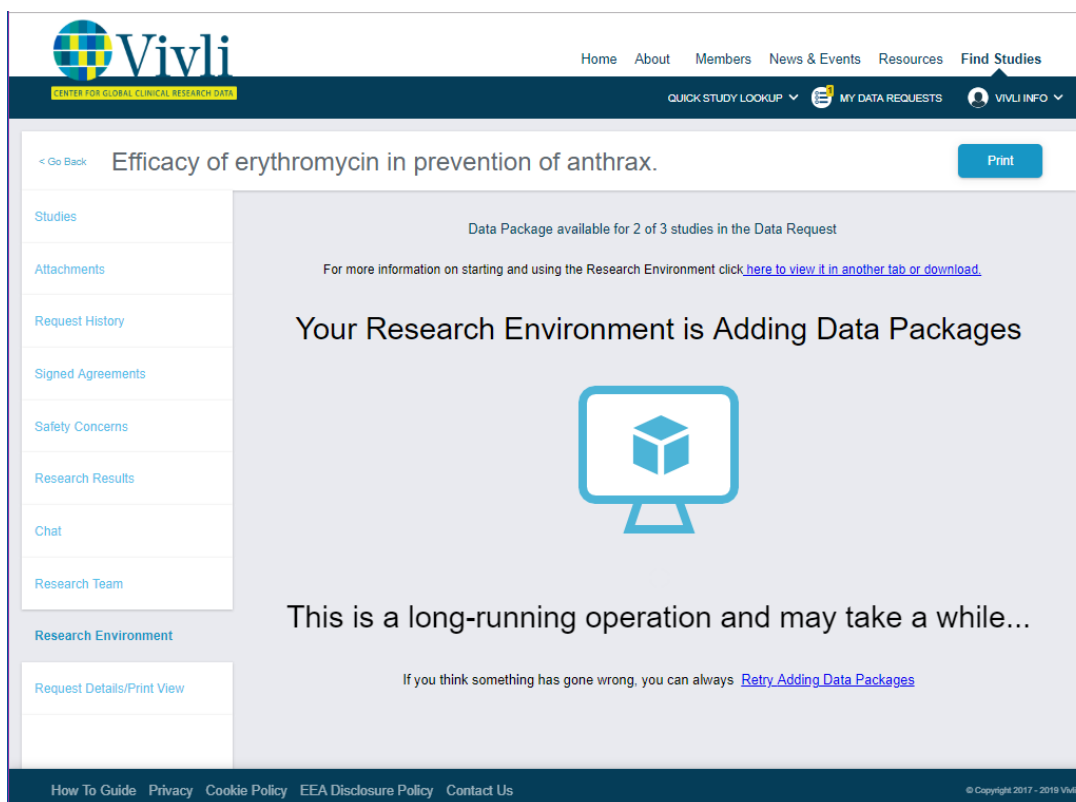

Figure 38 – Research Environment Adding data packages

6.3 Refreshing previously loaded data

The Vivli platform determines what new data should be loaded by looking for an existing folder with the appropriate name: if it finds a folder in the Research Environment with the original folder name for the study, it will leave that existing folder alone. This means that:

- If you have started to make changes to previously loaded data (e.g. for harmonization), your changes will **not** be overwritten.
- If you would like a fresh copy of the data for any reason, you can simply rename the existing folder, and the system will load a fresh copy of the data package.
- If you rename a data folder for any other reason, the system will load a fresh copy of the data using the original folder name. If the extra copy is redundant, delete it.

7.0 Safety Concerns

If you discover any information regarding the safety or risks of a product related to their requested data, you must inform Vivli and the Data Contributor of this discovery within 24 hours, per the terms of the Data Use Agreement.

The steps for reporting safety concerns are as follows:

1. Login to the Vivli Platform.

2. Click on the “Safety Concerns” tab on the dashboard:

The following screen will appear:

The screenshot shows the Vivli website interface. The top navigation bar includes links for Home, About, Members, News & Events, Resources, and Find Studies. Below this is a secondary bar with QUICK STUDY LOOKUP, MY DATA REQUESTS, and DATA REQUESTER. The main header displays the study title: "Ascending Multiple-dose Safety, Tolerance, Pharmacokinetic, and Pharmacodynamic Study of BMS-201038 in Healthy Volunteers". A left sidebar contains a menu with options: Studies, Attachments, Request History, Signed Agreements, Safety Concerns (highlighted), Research Results, Chat, Research Team, Research Environment, and Request Details/Print View. The main content area is titled "Supply your contact information and safety concern description below, then click 'Submit Safety Concern' to continue." It contains three input fields: "Name" (with "Data Requester" entered), "Email Address" (with "Datarequester.vivli@gmail.com" entered), and "Phone Number" (with "555-555-5555" entered). Below these is a large text area for "Describe the Safety Concern" with the text "Safety concern" entered. A "Submit Safety Concern" button is positioned below the text area. At the bottom of the main content area, there is a section for "Previously Submitted Safety Concerns". The footer includes links for How To Guide, Privacy, Cookie Policy, EEA Disclosure Policy, and Contact Us, along with a copyright notice for 2017-2021 Vivli.

Figure 39 - Safety Concerns tab

3. Complete the form and click on **Submit Safety Concerns**:

This screenshot is identical to the previous one, showing the Vivli website interface with the "Safety Concerns" tab selected. The form fields are filled with the same information: Name (Data Requester), Email Address (Datarequester.vivli@gmail.com), Phone Number (555-555-5555), and Describe the Safety Concern (Safety concern). The "Submit Safety Concern" button is visible below the text area. The sidebar and navigation bars are also consistent with the previous image.

Figure 402 - Submit safety concerns

8.0 Exporting Research Results

If you have preliminary or final results from your analysis, you may request the ability to export summary results from the Secure Research Environment. Any custom scripts you may have developed during the research can also be exported with the results. A shortcut to submit this request is on the desktop.

When submitting your request to export results, please note that Individual Participant Data (IPD) requested from this study will need to remain in the Vivli secure research environment. As such, there should be no attempt to try to remove IDP data or re-identify individual participants in the study you are requesting. Per your signed Data Use Agreement, any results derived from your analysis in the Vivli Research Environment, which will be used in subsequent presentation or publication, should be obtained by submitting a request for removal of this data.

Results exports should not include any individual participant data in the results. Acceptable results export is limited to summary representation of data (e.g. means, standard deviations, counts), derived data (e.g. slopes, clin pharm parameters) data, analytical and representations of results (e.g. graph), scripts or programs that you developed in the Research Environment. The following graphic is an example of a request to export results spreadsheet, including IPD, which would not be approved.

ID	TRTMT	AGE	RACE	SEX	EJF PER	EJFMETH	CHESTX	BMI	KLEVEL	CREAT	DIGDOSE	CHFDUR	RALES	ELEVJVP	PEDEMA	RESTDYS	EXERTDYS	ACTLIMIT	S3	PUL

Please note that all results should be submitted through the results export option.

8.1 Request to Export Results

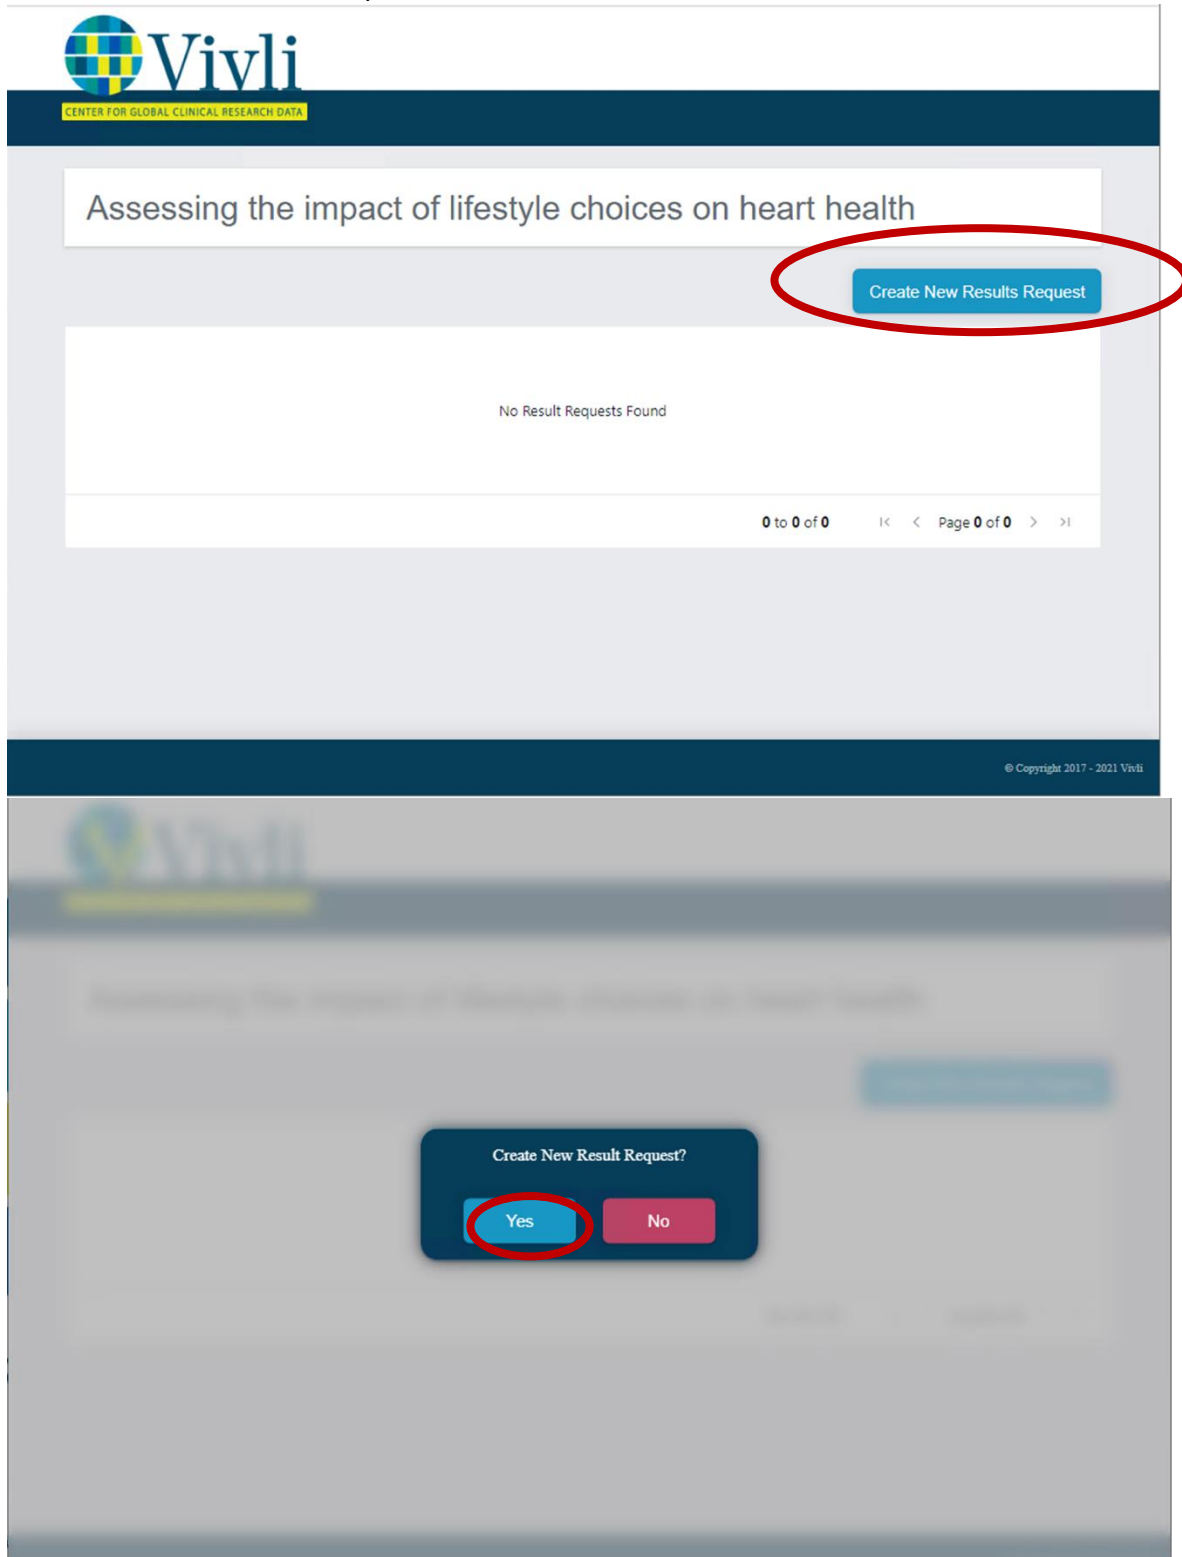

1. From the Vivli Research Environment, double click the Export Results icon on the Desktop.
2. Enter the Vivli User credentials you use to log onto the Vivli Platform – your username will be your email address..

3. From the dropdown menu, select your Vivli request. Please note, if you have more than one Vivli request which has a secure research environment, each request will appear in the menu.

4. Create a new results request.

5. Drag and drop, or select files, to copy your files into the export folder. If your results are organized into more than one folder, we recommend that you place the files into a single zip file before placing them in the results folder. 7-zip is included on the research

environment for that purpose. Similarly, if you have more than 5-10 files, place them into a single zip file.

CENTER FOR GLOBAL CLINICAL RESEARCH DATA

Assessing the impact of lifestyle choices on heart health

Requesting export of research results

To request export of research results, use Drag and Drop to drop the requested files onto the "Drop files here" control, then click submit when they are complete. When the results have been reviewed and approved, you will connect to the main Vivli Platform to download the results. Reminder - exporting individual participant data is not allowed.

Create New Results Request

2021-10-01	Data Requester	Result Request in Progress

1 to 1 of 1 |< < Page 1 of 1 > >|

Results not yet available for this request.

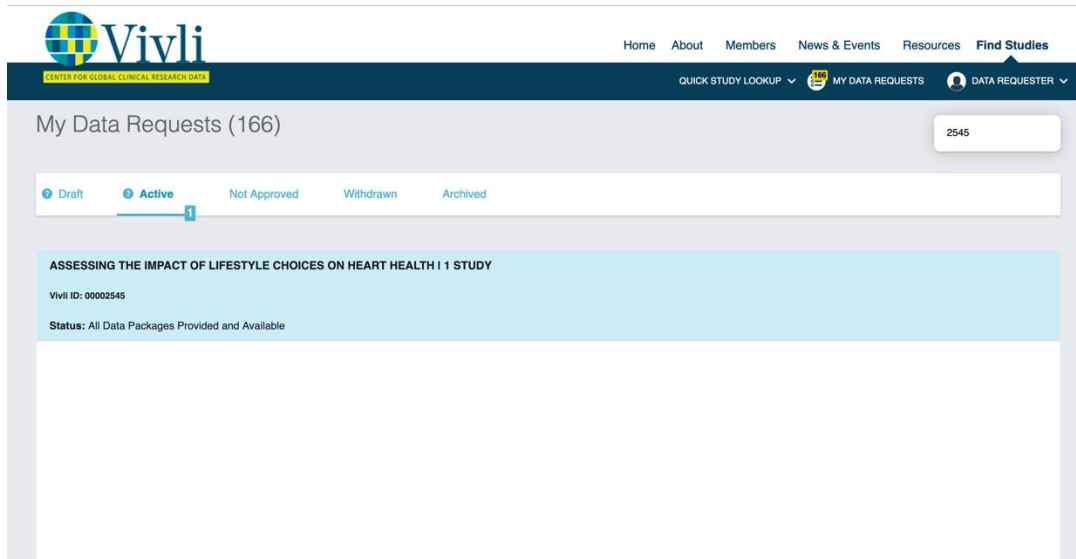

Please note, the processing time for a results export request is 5-7 business days. You will receive an email notification when a decision is recorded on the platform and can also monitor by checking the Research Results tab on the platform.

8.2 Downloading Approved Results

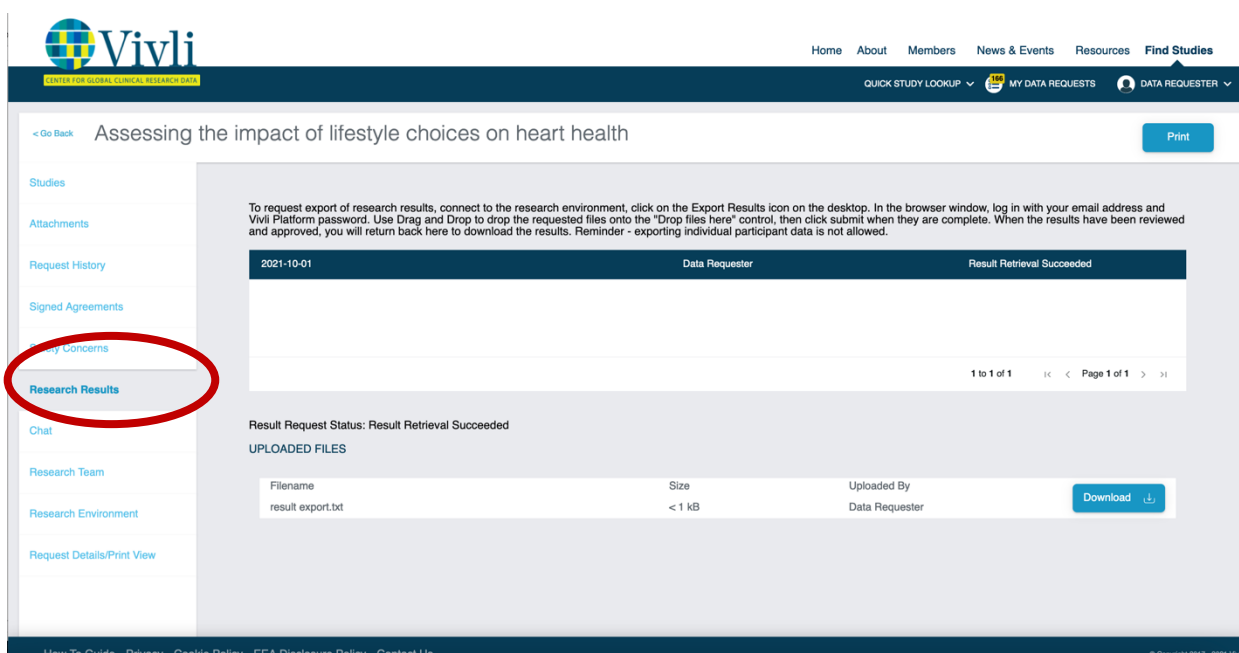

Once the request to export results is approved, the data requestor may download their results.

8.2.1 Steps, Exporting Results:

1. Login to the Vivli Platform
2. Navigate to **My Data Requests** and select the request:

3. Click on **Research Results**:

If you have made more than one request, click on the row corresponding to your most recent request – this will be on the top of the list. The row you have selected will be shown in dark blue.

4. Here, you will see if the request to export results has been approved:

If a review of the results identifies the presence of Individual Participant Data (IPD) in the result files, the Result Requests screen will display a message indicating that, and you will need to remove the IPD from the results files before requesting subsequent export of results again.

6. Once the **final** results are exported, please reach out to the Vivli Team via chat and we will provide next steps for deprovisioning the research environment and progression to publication.

9.0 Publication Review

9.1 Publication Follow up by Vivli

The Vivli administrator sends periodic reminders (at 3 months, 9 months and 1 year) to the researchers to get an update on the status of any potential publications from the time final results from the research environment are downloaded or a year after the downloadable data package was made available to the Data Requestor.

9.2 Publication Reviews by Data Contributors

- Once your researcher team has completed your analysis and you are ready to submit your findings for dissemination, either through a learned forum such a publication or conference abstract, requestors must submit to Vivli a copy of any Publication materials at least 30 days prior to submission. Please submit this publication using the Chat function.
- The following acknowledgement should be added to the dissemination of findings. Also, please use the following language in your acknowledgment section:

This [publication or presentation, as applicable] is based on research using data from data contributors *Data Contributor(s) Name*** that has been made available through Vivli, Inc. Vivli has not contributed to or approved, and is not in any way responsible for, the contents of this publication.**

- During this 30-day review period, data contributors may provide you with non-binding comments regarding the scientific content. They may also possibly request the deletion of any confidential information (confidential information as defined in the signed DUA).
- Once the 30-day publication review period is up or once all data contributors have commented on the manuscript, whichever comes first, the research team may submit their manuscript.
- The Vivli team will follow up monthly to check on the status.

9.3 Publication Notification by Data Requestor

- Once your team has been notified that your publication has been accepted by the journal and the DOI for your citation made available, please let the Vivli team know via chat.
- The Vivli team will then update your data request on the Vivli website by including the statistical analysis plan and the DOI to the publication.
- If this is your final analysis for the research project, please let Vivli know and if will move your analysis to long-term storage. See [section 12.0 Stopping the Research Environment](#). Vivli team will send you a survey about your experience on Vivli platform.
- If you have more publications linked to this research project, please follow step 9.2 Publication Reviews by Data Contributors for each subsequent publication.

9.4 Public disclosure not possible

- If for whatever reason, you are unable to publish your results. You can provide a summary report of your findings and Vivli will publish this report on its website. For an example see: <https://vivli.org/identification-of-biomarkers-associated-with-specific-sleep-variables/>. Vivli will then de-provision your research environment and your project will be complete.

Alternatively, you may fulfill the obligations under the Vivli DUA and submit to a pre-print server such as <https://www.medrxiv.org/>. This preprint server was started by the BMJ and Yale and is a free distribution server for preprints of articles covering all aspects of research. Once posted you would receive a DOI so it would be citable and discoverable. You can cite this on your CV and continue to submit to other journals if you like.

9.4.1 [Reasons why analysis may not be completed](#)

If the analysis is not completed, this fact and the reason that it was not completed, should be stated as a summary of the research.

- The analysis may not be performed or completed due to the following reasons:
 - Technical - e.g. datasets can't be combined, the research questions can't be answered, data mapping isn't possible
 - Scientific - e.g. the studies can't be combined due to design differences or endpoint differences
 - Logistical - e.g. the Data Requestor loses funding or key research personnelAccording to Vivli policy, if a user fails to meet their DUA obligations and does not respond with reasons why their analysis has not been completed, they are unable to submit a subsequent request from Vivli.

10.0 Extensions to the Data Use Agreement

- The Vivli team will reach out to the Data Requestors for an update on the data request and analysis 90 days prior to the 1-year DUA expiration.
- The Vivli Administrator sends them the Request to Extend Access to the Data form.
- To request an extension, the Lead Researcher fills out the Request to Extend Access to the Data form
- Vivli team will follow up on the Data Access Extension form 45 days, 30 days, 3 weeks, 2 weeks and 1 week prior to the DUA expiration.
- Based on the response, Vivli makes the decision regarding extending access to the data in six-month intervals up to a maximum of 2 years. These extensions are only granted due to extenuating circumstances. After that, any extensions will need to be reviewed by the Data Contributors who may approve or decline the extension. Vivli will respond in 10 business days with a decision that has been reached and upload the Extension decision document via Signed Agreements on the Vivli platform.

- If no response is received before the end of the Data Use Agreement, Vivli team stops the Research Environment and remove the team's access to the research environment on the day of DUA expiration.
- If no response is received within 60 days of DUA expiration, Vivli team will deprovision the Research Environment and the request will be considered withdrawn which may result in losing the analysis done thus far.
- Note: For any requests for downloadable data, Vivli team will request for evidence of data destruction as per the data security addendum.
- Note that an extension to the Data Use Agreement (a legal agreement) is entirely separate from the No Charge period on the Research environment and does not extend the No Charge period.

10.1 Failure to meet DUA obligations

According to Vivli policy, if a user fails to meet their DUA obligations, they are unable to submit a subsequent request from Vivli.

11.0 Paying for a Research Environment

The cost and length of courtesy billing periods for the Secure Research Environment access are available on the Vivli [website](#). Please note these charges are subject to change.

Note that the courtesy billing period (i.e., the length of time where you will not be charged) begins on the date you first provision the Research Environment, which usually is later than the date that the Data Use Agreement is signed. Renewing the Data Use Agreement does not extend the courtesy billing period.

As you near the end of your courtesy billing period, Vivli will send you notices via email to the email addresses of the research team members on the data request. In these notices we will remind you of the end date of your courtesy billing period. **We will ask you to provide payment via a credit card once your courtesy billing period has ended.** Charges will be automatically completed on the same day of the month, approximately every 30 days, as when payment is first submitted for the next month's usage. A constant 30 days per month will be charged, and your subscription will be cancelled and no further charges made as soon as you submit a public disclosure for courtesy review.

If no payment method is arranged, access to the Research Environment will be revoked.

Please note that you will be responsible for all charges once your courtesy billing usage period has ended. Once you have completed your research, submitted a public disclosure for courtesy review, and stopped your secure research environment then this will stop the accrual of additional fees. See [section 12.0](#) for further information about stopping the research environment.

1. At the end of your courtesy billing period, the Vivli team will email you with the appropriate link to sign up for subscription billing for the secure Research Environment within 1 week of your courtesy billing end date. The subject line will be “Action Required: Vivli Research Environment ALERT – Payment Request to Maintain Access to data request”
2. Upon opening the link, you will be directed to the PayPal page where you can login with your PayPal account or enter the credit/debit card number to be used for billing.

The image shows the PayPal login interface. At the top is the PayPal logo. Below it, the text "Pay with PayPal" is displayed, followed by a smaller line: "With a PayPal account, you're eligible for Purchase Protection and Rewards." There are two input fields: "Email or mobile number" and "Password". Below the password field is a link that says "Forgot password?". A large blue button labeled "Log In" is centered below the fields. Below the button is the word "or" and a button labeled "Pay with Debit or Credit Card". At the bottom, there is a language selector showing "English" with a dropdown arrow, and other language options: "Français", "Español", and "中文".

The image shows a PayPal checkout page. At the top left is the PayPal logo. To its right is a shopping cart icon with the text "\$750.00 USD". Below the logo, the text "PayPal G" is visible, followed by "We don't share". There is a dropdown menu for "Country/Region" with "United States" selected. Below this is a "Card number" field. A modal window titled "Vivli INC" is overlaid on the page, showing "Subscription Details: \$750.00 USD for each month (Renews until you cancel)" and "Starts on: Feb 21, 2023". Below the modal, there is a table with two rows: "Monthly Premium Research Environment Usage" and "Total", both with a value of "\$750.00 USD". Below the table are fields for "Expires", "CSC", "First name", and "Last name". Below these is a "Billing address" section with fields for "Street address", "Apt., ste., bldg.", "City", "State" (a dropdown menu), and "ZIP code". At the bottom, there is a checkbox labeled "Ship to my billing address" which is checked. To the right of the form, there is a graphic of shopping bags and a shield, with the text "PayPal is the safer, easier way to pay" and "No matter where you shop, we keep your financial information secure."

3. After entering the credit card details, click the Agree & Subscribe button. Please note that you will be charged every 30 days on approximately the same date each month going forward.

☐ No, I don't want an account now.

We'll save your PayPal info for future purchases with Vivli INC. If you hold a balance, we'll use it first. If your chosen payment method is unavailable, we'll try the other payment methods in your wallet.

Agree & Subscribe

4. Lastly, you should receive confirmation from PayPal that you have Successfully signed up for your subscription for the Research Environment and also a receipt of your first payment to the email address shared with PayPal.

If you have any questions about this process, please contact Vivli at support@vivli.org.

12.0 Pausing the Research Environment

- When you have submitted your publication for review and are awaiting feedback, you may reach out to the Vivli Team in chat to request a “pause” of your research environment. This will preserve any remaining courtesy billing days for subsequent analysis, if required. If you are paying for your environment, requesting to “pause” will stop the accrual of additional fees.
- Once your research environment has been stopped, this will stop the accrual of additional fees until a request to re-access has been submitted.
- **Important:** Before requesting to “pause” the environment, please copy any data that you might need later access to onto the Network Drive (Drive V:\). Once disabled, access to content in the Research Environment will be terminated. Note that long-term archive will ONLY save the contents of drive V. Data saved in any other drive will be deleted: so please place any essential data to Drive V.
- If you need access to data while your request is “paused”, simply reach out to the Vivli Team in chat or via support@vivli.org and will provide next steps for resuming your analysis.

13.0 Deprovisioning the Research Environment

- When you have completed your research, exported your final results and published your findings, the Vivli team will provide next steps, as needed, to deprovision your research environment and prepare data for long term archive.
- **Important:** Before requesting to deprovision the environment, please copy any data that you might need later access to onto the Network Drive (Drive V:\). Once disabled, access to content in the Research Environment will be terminated. Note that long-term archive will **ONLY** save the contents of drive V. Data saved in any other drive will be deleted: so please place any essential data to Drive V.
- Shortly after your research environment has been marked for deprovisioning, Vivli will place a copy of the contents of the data disk into long-term archive.
- If you need access to data held in the Vivli long-term archive, please send a request to the Vivli Team via support@vivli.org including the Data Request number and Project Name. Processing this request takes 5-7 days.
- If you need access to long-term storage data for a new research project, to address a different question and/or if you are requesting additional data, you will need to create and submit a new data request on the Vivli platform. In the Narrative, reference the original data request, including the request number.

1. To deprovision the environment, go to the launch page for the research environment:

The screenshot displays the Vivli Research Environment interface. At the top, the Vivli logo and navigation menu are visible. The main content area shows the title 'Efficacy of erythromycin in prevention of anthrax.' and a status message 'Data Package available for 1 of 3 studies in the Data Request'. A large green checkmark and the text 'Research Environment Running' indicate the environment is active. Below this, the username 'vivliuser7871' is displayed. Two buttons, '1. Copy Password to Clipboard' and '2. Connect to Environment', are shown. A note instructs users to copy their password and connect to the environment. At the bottom, three buttons are visible: 'Add Data Packages', 'Stop Environment', and 'Deprovision Environment'. A warning message states: 'Stopping your environment simply shuts it down, but deprovisioning your environment will permanently delete it.'

Figure 53 - Launch page

2. Click on **Deprovision Environment**:

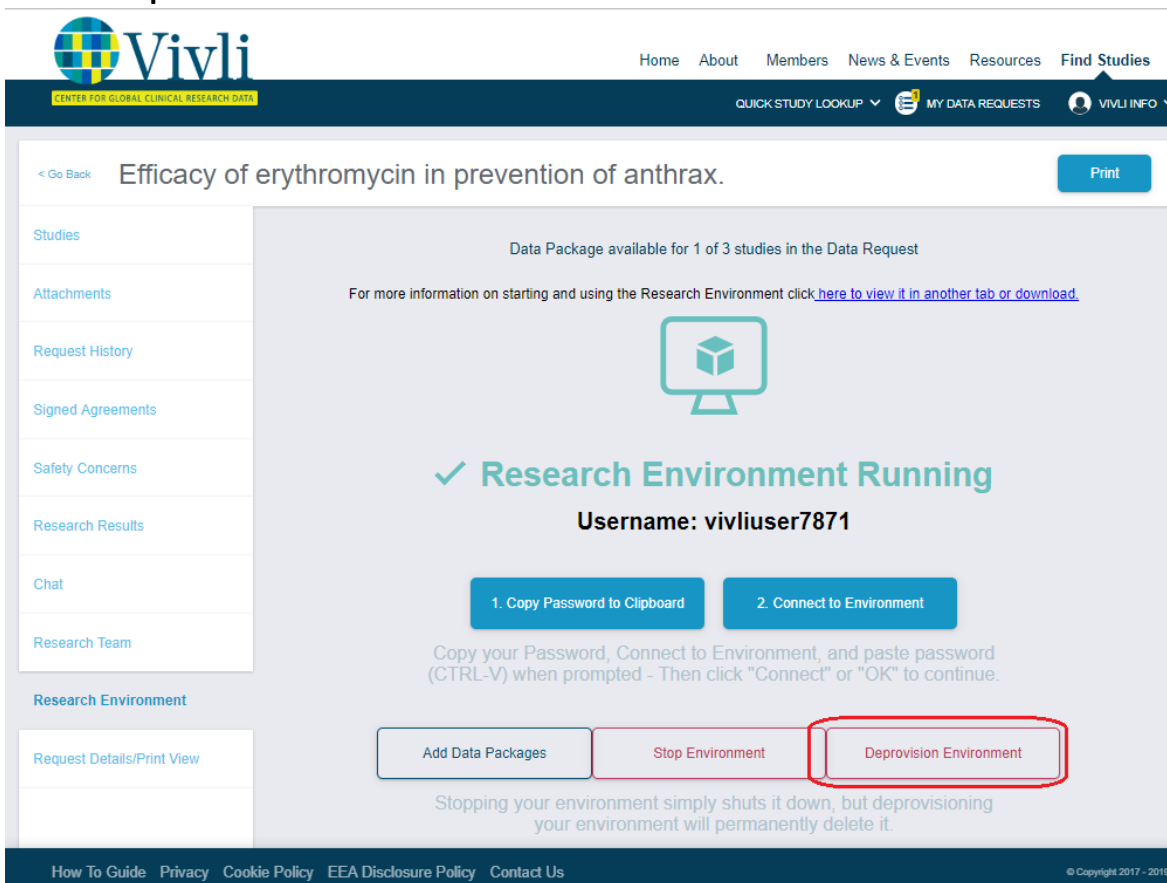

Figure 54 - Deprovision Environment

3. The following pop-up will appear:

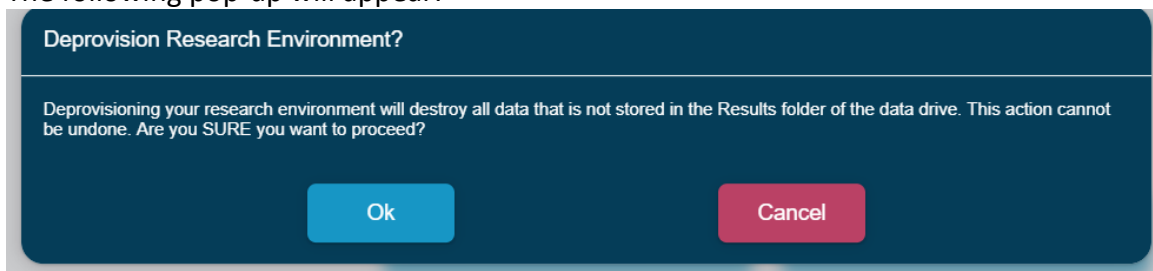

Figure 55 - Deprovision confirmation pop-up

4. Click **Ok** to Deprovision the research environment:

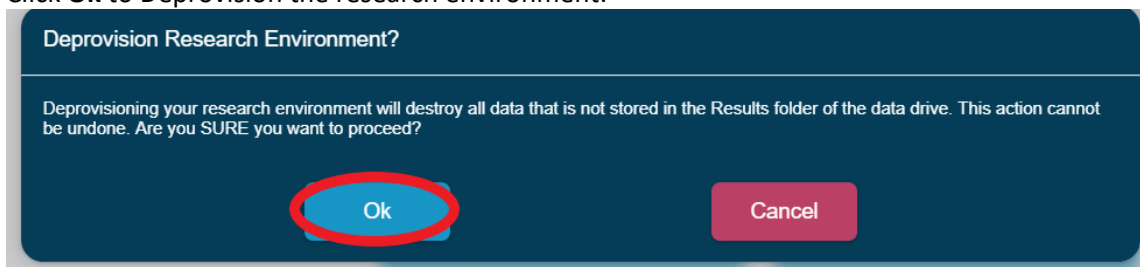

Figure 56 - Deprovision confirmation pop-up, OK

5. The following screen will appear, and you may navigate away from this screen at any time:

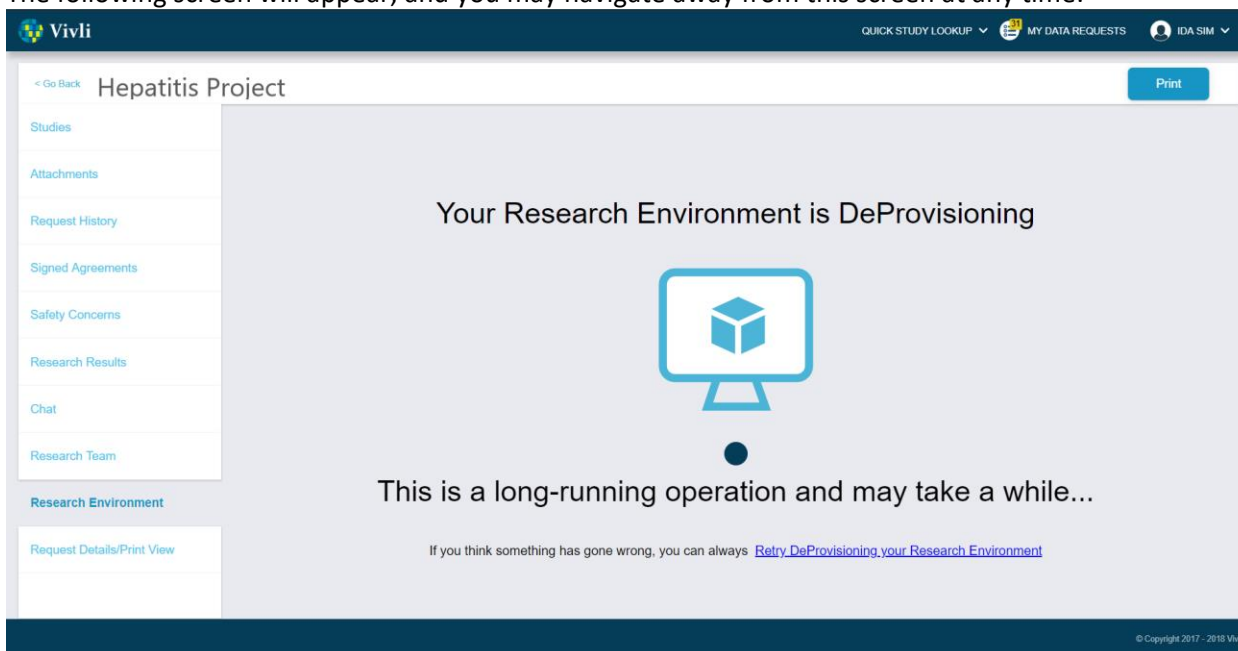

Figure 57 - Deprovisioning working screen

6. If you remain on this screen, then the process is complete, the following screen will appear:

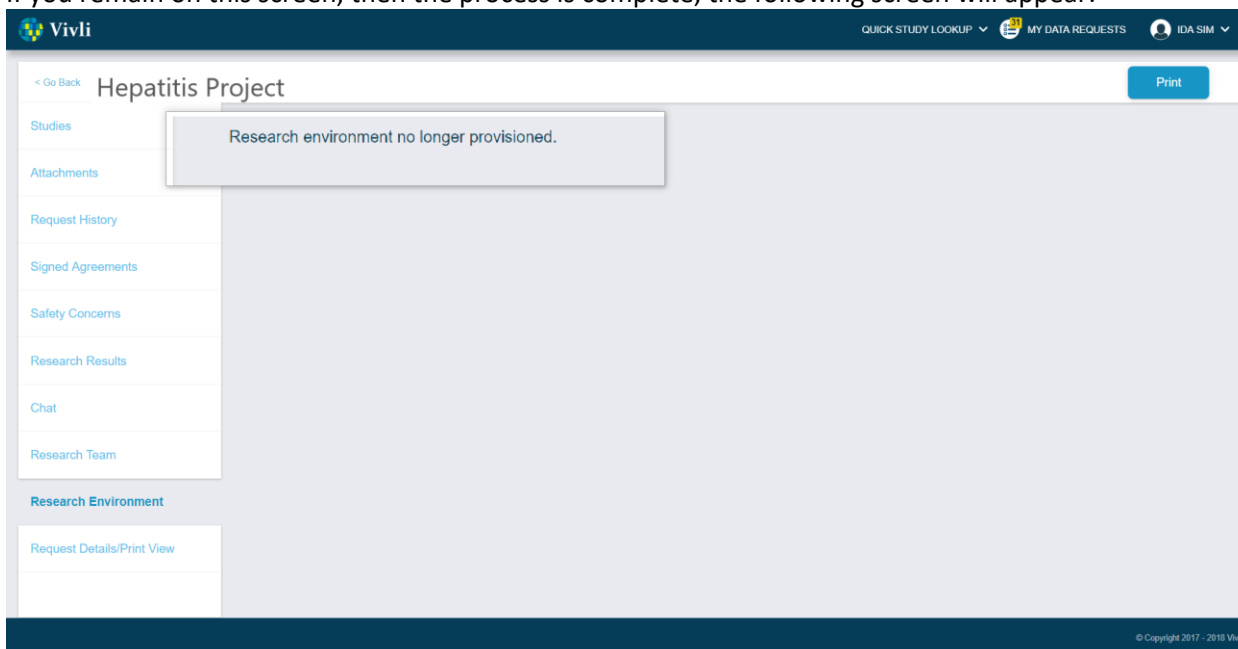

Figure 358 - Deprovision complete screen

Note, Vivli will also send an automatic email indicating that deprovisioning has been completed.

If you accidentally deprovision a research environment, contact Vivli at support@vivli.org. Vivli will re-provision the environment, including any results files.

14.0 Downloadable data

Some Data Contributors will allow you to download their data directly from the Vivli Platform using the following process:

1. Log in and open your approved data request:

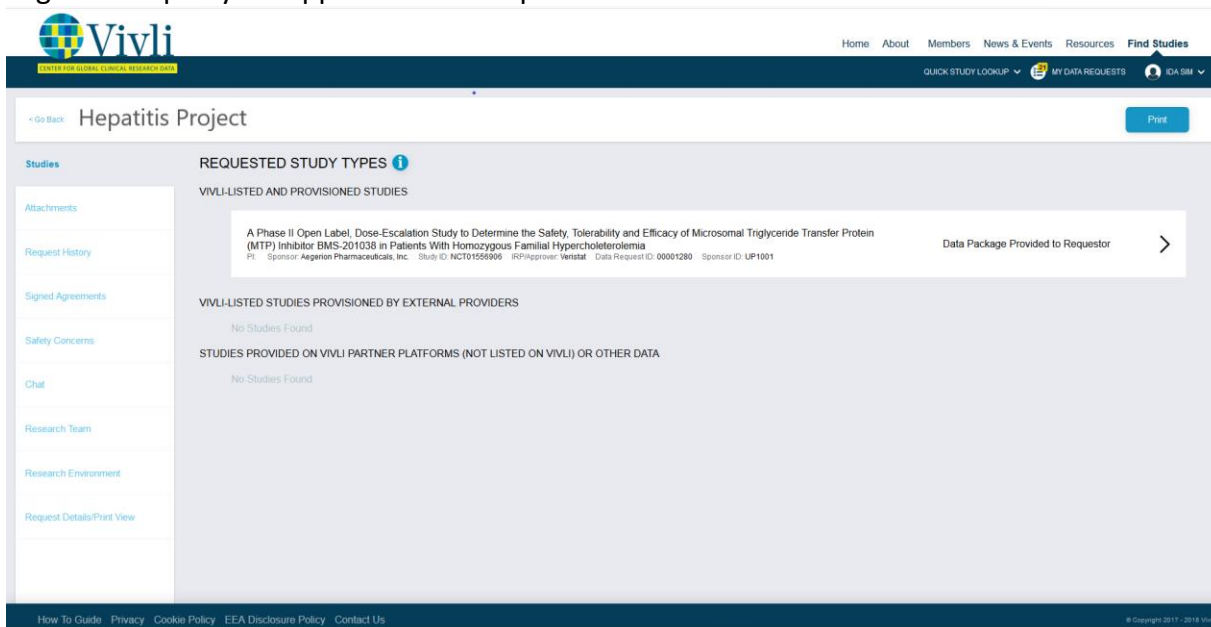

Figure 26 - Approved Data Request

2. Click on the study to get to the **Study details** screen:

Figure 27 - Study details screen

3. Click on Download Data Package:

The screenshot shows the Vivli website interface. At the top, there is a navigation bar with links: Home, About, Members, News & Events, Resources, and Find Studies. Below this is a header for the study: "A Phase II Open Label, Dose-Escalation Study to Determine the Safety, Tolerability and Efficacy of Microsomal Triglyceride Transfer Protein (MTP) Inhibitor BMS-201038 in Patients With Homozygous Familial Hypercholesterolemia". The "Download Data Package" tab is highlighted with a red box. Below the tabs, there are several sections: "Phase" (Phase 2), "Condition or Disease" (Homozygous Familial Hypercholesterolemia), "Intervention/treatment" (Lomitapide), "Brief Summary" (The primary objective of this study is to evaluate the safety and tolerability of 4 doses of lomitapide...), "Ages Eligible For Study" (13 Years and older), "Sexes Eligible For Study" (All), "Accepts Healthy Volunteers" (No), "Actual Enrollment" (6), "Study Start Date" (06/2003), "Study Completion Date" (02/2004), "Recruitment Status" (Completed), and "Locations" (United States (1)).

Figure 28 - Download Data Package

4. This will take you to the Download screen:

The screenshot shows the Vivli website interface. At the top, there is a navigation bar with links: Home, About, Members, News & Events, Resources, and Find Studies. Below this is a header for the study: "A Phase II Open Label, Dose-Escalation Study to Determine the Safety, Tolerability and Efficacy of Microsomal Triglyceride Transfer Protein (MTP) Inhibitor BMS-201038 in Patients With Homozygous Familial Hypercholesterolemia". The "Download Data Package" tab is selected. Below the tabs, there is a section titled "DOWNLOADABLE DATA PACKAGE - PRESS DOWNLOAD BUTTON FOR EACH FILE". Below this is a table titled "UPLOADED FILES".

Filename	Size	Uploaded By	File Type	
test IPD.xlsx	6.00kB	Jessica B Baker	IPD	Download
Test Protocol.docx	13.00kB	Jessica B Baker	Protocol with Amendments	Download
Test SAP.docx	13.00kB	Jessica B Baker	Statistical Analysis Plan	Download
TestFile.docx	12.00kB	Jessica B Baker	Data Dictionary	Download

Figure 29 - Download Screen

5. Depending on your browser, a pop-up will appear:

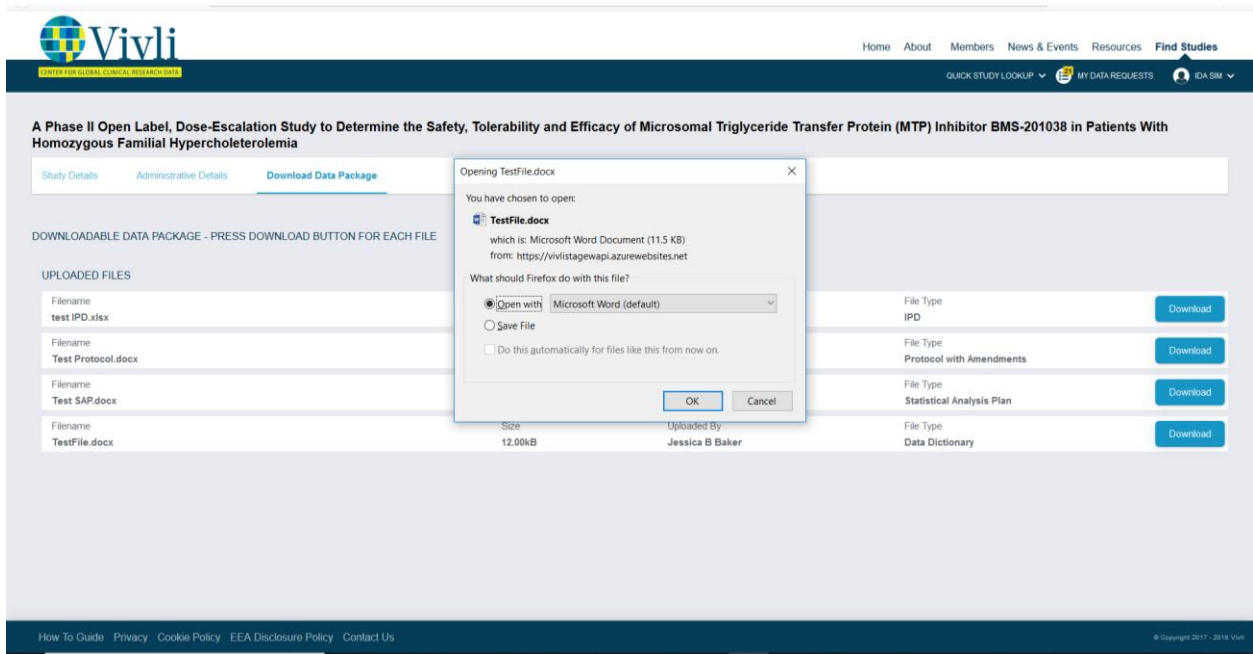

Figure 30 - Downloadable data file selection pop-up

6. Select the target file, choose whether you would like to Save or Open the files and click **Ok**.
7. Repeat Step 6 for any additional files.

Tips for downloading files from Vivli

When files are available for direct download from the Vivli platform, the usual approach to downloading files is to open the approved data request, open the studies tab, click on the "card" for the study, go the download data package tab and click "Download" for each individual file that you need to download.

If the size of the file is more than 1000MB, you should take a few extra precautions before starting the download

- In your computer settings, set Power Plan to sleep "Never" when plugged in. (sleeping will interrupt the download)
- Once you start the download, leave the computer running and the browser open.
- The progress of the download is shown in different places depending on the browser (for example for Chrome it is shown in the lower left, and for Firefox it is shown in the upper right - note that for Firefox, the progress pop-up is taken down after a few minutes - you can check back on progress by clicking on the download icon on the upper right)
- If the download takes more than 30 minutes, the Vivli Platform will automatically log you out, but the download will continue until it is complete.
- Do not download more than one file at a time

The time the data will take to download can vary a great deal based on your available bandwidth, the size of the file(s), the time of day, what else is happening on your local network (e.g. Zoom calls can use up bandwidth) and even how full or fragmented your disk is. To

provide a *very* general guideline, in home environments, download time can vary from 1 minute per gigabyte (for a network with 400 Mbps download speed) to 15 minutes or more. When downloading using a business address or a high-end fiber network, it may be faster, sometimes much faster.

Other upload tips:

- If it is practical, often downloading is faster in the evening or overnight, as you are competing with less traffic on the internet.
- For large downloads, before starting the upload, it can be useful to reboot your computer - this can free up some memory and reset some elements of the operating system.

Finally, if the total volume of data to download is much greater than 25 Gb or so, or if you have problems with large downloads (such as network glitches, other errors, or the download just takes too long) reach out to Vivli at support@vivli.org - we can provide instructions for using a Microsoft upload/download manager that takes a few extra steps, but is faster and more reliable.

If the files have extensions of the form .001, .002, then this was a large zip file that was split into pieces by 7-zip for ease of upload and download. Make sure you download all of the numbered files into the same folder. If you don't already have 7-zip, download a copy of 7-zip from <https://www.7-zip.org/download.html>. Right-click on the .001 file and drag to a new folder, and from the pop-up menu, choose 7-zip -> Extract here. The utility 7-zip knows enough to combine the pieces logically together as part of the unzip operation.

15.0 Feedback and Support

If you need technical help with your research environment, please email Vivli at support@vivli.org and we will assist you as soon as possible. Please provide as much information as you can to the problem, including the research proposal number, the time the problem and any messages you received from the platform occurred as this will make it easier for Vivli to diagnose and fix the issue.

If you ever have thoughts on how to improve the system or processes, please email support@vivli.org or reach out to Vivli via chat. When you have completed your project, Vivli will ask you to complete a short survey to help us continue to improve.
